BBFA101	FUNDAMENTAL OF INDIAN ART	2L:1T:0P	3 Credits

Objectives

This module is designed to weave the concept of Art in the mind of a student. It is very important to understand the nature of art. Art as an expression of thoughts, ideas and communication needs to be understood to make a solid foundation for the course.

Desired outcome of the course

From this module, students shall be able to understand the immensity and role of art in their daily life. It shall establish the concept of Art in their consciousness. Students shall be acquainted with art from an expansive viewpoint.

BBFA101	FUNDAMENTAL OF INDIAN ART-I	2L:1T:0P	3 Credits

Unit	Topics	Lecture
I	**Art** ● Definition of art ● Relationship between Art and the Artist ● Art is an essential part of the real world. ● Expression and Self-Expression ● "Art as a powerful medium of self-expression." ● "Art for Art's sake." ● Definition of Concept in Art ● Content and Style as the essence of Art ● Meaning and Definition of Iconography	8
II	**Six Limbs** ● Rupabheda ● Pramanani ● Bhav ● Lavanya Yojna ● Sadrisya ● Varnika Bhang	8
III	**Indian Art** ● Prehistoric Art ● Indian Rock Art	12
IV	**Valley Civilization of Indian Art**	12

V	**Vedic Era** ● Early Vedic Period ● Later Vedic Period	

Evaluation Methodology

- Written test
- Assignments

BBFA102	**BASIC HINDI**	**1L:0T:0P**	**Comm. Audit Course**

Objectives

To enable the students to read and comprehend complex texts, write logical, coherent and grammatically correct Hindi.

Desired outcome of the course

Students will be able to Read, write, speak and comprehend Hindi.

BBFA102	**BASIC HINDI**	**1L:0T:0P**	**Comm. Audit Course**

Unit	**Topics**	**Lecture**
I	**हिन्दी व्याकरण** ● **संज्ञा, सर्वनाम, विश्लेषण, क्रिया, क्रियाविश्लेषण, कारक** ● **संधि, समास, उपसर्ग, प्रत्यय, पर्यायवाची, विलोमशब्द, मुहावरा, लोकोक्ति, अनेक शब्दों के एक शब्द**	**10**
II	**पत्र लेखन**	**5**
III	**आंग्रेजी अनुच्छेदों का हिन्दी में अभ्यास**	**10**
IV	**निबंध लेखन**	**5**

Evaluation Methodology

- Written test
- Assignments

BBFA151	**FUNDAMENTAL OF DESIGN**	**0L:2T:4P**	**3 Credits**

Objectives

Design is an arrangement of various forms and shapes for a specific purpose in a given space. It establishes the coordination of different forms with the available space in a harmonious way. Different articles, objects and shapes are used to create an arrangement and establish a relationship, which is pleasant to the eye of a viewer. During this module, students will be able to understand the concept of design, its elements and the principals involved in making a good design. This subject develops a sense of arrangement and movement in the mind of an artist.

Desired outcome of the course

From this module, students will be able to understand the concept of design. They will be able to design, taking ideas from natural objects and their surroundings. They will learn different types of designs and their purpose in everyday life. They will be able to understand the quality of lines, shapes, forms and their behavior when they are in proximity to each other. It will help students to create a sense of intuitive balance and rhythm with the help of designs. Students will be trained to use their eyes to see a good design. Their hand and eye will be synchronized and work in tandem to create any piece of art.

BBFA151	**FUNDAMENTAL OF DESIGN-I**	**0L:2T:4P**	**3 Credits**

Unit	**Topics**	**Practical Hours**
I	**Line** ● Creation of different effects and moods using different types of lines ● Exercises of different kinds of line in a square format	**6**

II	**Forms** ● Forms and their types, role of forms in design ● Exercises on creating a design in square format using basic geometric forms	**6**
III	**Design embedding within a form** ● Creation of a design with animal images ● Implanting the above design into basic forms such as triangles, squares and circles	**6**
IV	**Design based on study of form objects** ● Using and overlapping of designs for creating interesting forms ● Exercises to design using the different object available in the environment	**6**
V	**Design based on study of nature** ● Use of elements from nature to create a good design ● Exercises on arrangement of elements in a square format	**6**
VI	**Lettering, Calligraphy and Typography** ● History of Writing ● Development of Alphabet ● Different Calligraphic Schools ● Script Styles ● Roman Lettering ● Classification of Types ● Study of One Family of Serif and San-serif ● Typeface and rendering the same ● Hot Metal types ● Types in digital form ● Leading and word spacing	**10**

Evaluation Methodology

- Individuals daily performance
- Project Review: Mid Semester
- Project Submission: End of the Semester

BBFA152	**INTRODUCTION TO THE COMPUTER**	**0L:1T:4P**	**3 Credits**

Objectives

Computers are a basic tool used in the modern world. It is important for the students to have a basic learning and usage of computers. This will create a foundation for future use of graphic application and professional career building. This learning is an asset for the artist to come at par with modern technology. They should be able to learn and work on the computer with ease.

Desired outcome of the course

From this module students will be able to understand computer technology used in the area of art. They will be able to operate computers and use them for their artistic purpose. They will learn the different types of basic software and graphic software, which are widely used for the graphical representation.

BBFA152	**INTRODUCTION TO THE COMPUTER**	**0L:1T:4P**	**3 Credits**

Unit	Topics	Practical Hours
I	**Introduction to Computers** ● Introduction to Computers ● Definition, Characteristics and history and evolution ● Types of computers and their Classification and application ● Components of Computers	**10**
II	**Hardware** ● Hardware: Input/Output Devices ● Hardware Optimization Processors ● Ports, ● Cables ● Types of Storage Device, Backup Devices · Memory, Cache, Display, Resolutions, Graphic Cards, VRAM	**10**

III	**Software and OS** ● Introduction to Windows, Internet Explorer ● Introduction to OSX (Apple) ● Introduction to Graphic Software (Corel Draw) ● Window Accessories: Paint Brush, Notepad and WordPad	**5**	**Evaluation Methodology** ● Individuals daily performance ● Project Review: Mid Semester ● Project Submission: End of the Semester
IV	**Introduction** ● CorelDRAW overview, interface, and vector vs. raster graphics ● **Basic Drawing Tools** ● Creating shapes, using the Pen and Bezier tools, basic transformations. ● **Colour Theory** ● Applying colours and gradients, understanding colour models and palettes. ● **Text and Typography** ● Adding and formatting text, working with fonts and type effects. ● **Advanced Drawing Techniques** ● Editing nodes and curves, creating patterns and textures. ● **Working with Images** ● Importing, adjusting, and tracing images. ● Layout and Design Principles ● Creating layouts, using guides, grids, and designing for different media. ● **Effects and Enhancements** ● Applying effects, using artistic media tools, and 3D effects. ● **Preparing and Exporting Files** ● Understanding file formats, exporting designs, and preparing for production. ● **Project Work and Portfolio** ● Developing a design project, creating a portfolio, and peer reviews. ● **Final Project and Review** ● Completing and presenting the final project, reviewing course content.	**15**	

BBFA153	**VISUALIZATION & REPRESENTATION -I**	**0L:1T:4P**	**3 Credits**

Objectives

Perspective:

- Understand the principles of linear perspective and how to apply them to create convincing and realistic representations of space.
- 2. Learn to create a sense of depth and distance on a flat surface using perspective techniques.
- 3. Develop skills in drawing and rendering scenes with accurate perspective, including one-point, two-point, and three-point perspective.
- 4. Understand how to use perspective to create a sense of atmosphere and mood in a piece of art.

Geometry:

- Understand the basics of geometric shapes and forms, including points, lines, angles, and planes.

- Learn to identify and render basic geometric forms, such as spheres, cylinders, and cones.
- Develop skills in using geometric shapes to create complex forms and compositions.
- Understand how to use geometry to create balance, proportion, and harmony in a piece of art.

Desired outcome of the course

- Improve their drawing and rendering skills
- Create more convincing and realistic representations of space and form
- Develop their understanding of composition and visual structure
- Enhance their ability to convey depth, distance, and atmosphere in their art
- Build a strong foundation for further study in fine arts and related fields.

BBFA153	**VISUALIZATION & REPRESENTATION- I**	**0L:1T:4P**	**3 Credits**

Unit	**Topics**	**Practical Hours**
I	**Introduction to Geometry(2D)** Finding geometry around us, Tessellations, Islamic geometry, 2D solids (seed of life, germ of life, flower of life, fruit of life, tree of life), golden ratio, Form development	**15**
II	**Introduction to Perspective** ● What is Perspective? ● Why perspective ● Types of perspective ● Terminology of perspective	**10**
III	**Linear Perspective:** ● One point perspective ● Two point perspective ● Three point perspective	**5**

IV	**Eyes Views** ● Bird Eye View ● Rat Eye View, e.t.c	**10**

Evaluation Methodology

- Individuals daily performance
- Project Review: Mid Semester
- Project Submission: End of the Semester

BBFA154	**ELEMENTS AND PRINCIPLES VISUAL PERCEPTION**	**0L:2T:4P**	**3 Credits**

Objectives

Drawing is the basis of any art course. The subject aims at establishing hand-eye coordination while drawing any object. During this module, the students are trained to understand the importance of proportion while drawing. This subject develops the sense of line, space and volume in the mind of an artist.

Desired outcome of the course

From this module students will be able to understand the concept of line. They will be able to draw the objects using different types of lines. Students exhibit the capacity to create volume with the help of lines

and draw with an intuitive attitude. Synchronization of hand and eye will be well established and students can work in tandem to create any piece of art.

BBFA154	**ELEMENTS AND PRINCIPLES VISUAL PERCEPTION**	**0L:2T:4P**	**3 Credits**

Unit	Topics	Practical hours
I	**Sketching** ● Rapid sketches ● Proportion in drawing ● Memory Drawing	**15**
II	**Exercise of different types of lines** ● Different types of lines, their nature, emotions and effects. ● Creation of art work using different types of lines.	**10**
III	**Drawing from still objects** ● Drawing a still life using different objects of different sizes and shapes ● Concept of materials and shapes	**5**
IV	**Drawing of foliage (plants)** ● Study of nature using lines ● Creating volume through lines ● Use of pressure to create the required effect of light and shade	**5**
V	**Drawing from model** ● Drawing a human figure with rapid speed ● Ideal proportions of human body ● Examples of drawings of great masters	**5**

Evaluation Methodology

- Individuals daily performance
- Project Review: Mid Semester
- Project Submission: End of the Semester

BBFA155	**PAINTING-I**	**0L:2T:4P**	**3 Credits**

Objectives

Painting is the ability of applying colour and tone to any given space. The knowledge of painting and accurate handling of colours is the fundamental need for the development of an artist. The core learning of the course is to see colours in different lights and study the change that results according to the intensity of light. This course aims at developing a sense of harmony and the concepts of opposite and complementary colours and use them appropriately.

Desired outcome of the course In this module the students will be able to understand the concept of colours. They will be able to paint and handle different kinds of colours and mediums. Students will be able to see the colours in natural as well as artificial light. They will be able to draw a conclusive opinion about the behaviour of colours in different environments.

BBFA155	PAINTING-I	0L:2T:4P	3 Credits

Unit	Topics	Practical Hours
I	**Exercise with Basic colours** ● Colours and their behaviour ● Basic colours and different colour models	10
II	**Exercise with Secondary colours** ● Secondary colours and their preparation using basic colours ● Number of secondary colours that can be made from basic colours ● Colour wheel, colour scheme	15
III	**Exercise with Colors and tones** ● Importance of colours and tones ● Using tones in creating an art object	5
IV	**Exercise with Colour wheel** ● Types of Colour wheel ● Importance of colour wheel in understanding the nature and harmony among colours	5
V	**Exercise with colours expression** ● Usage of colours to create an expression in art Effect of colours on moods	5

Evaluation Methodology

- Individuals daily performance
- Project Review: Mid Semester
- Project Submission: End of the Semester

BBFA156	**CLAY MODELING (POTTERY)**	**0L:1T:2P**	**2 Credits**

Objectives

Art is to see an object in 2D as well as 3D perspective. Clay modelling will help the students to develop a three-dimensional vision. Students will be able to feel the objects and materials. This exercise is designed to develop a sense of proportion and volume in students.

Desired outcome of the course

In this module, students will be able to understand the concept of modelling and volume in the given time and space. They will be able to make 2D and 3D miniatures of objects available in nature and their surroundings. They will learn the different types of clays modelling and materials that are used for the same. They will develop skills to use the tools available, the quality of material, their behaviour, maintenance and durability. Their hand and eye will be synchronised with the proportion and volume of the object.

BBFA156	**CLAY MODELING (POTTERY)**	**0L:1T:2P**	**2 Credits**

Unit	List of Practicals	Practical Hours
I	**Creating 3D form with clay** ● Creation of simple Pottery in clay Usage and preparation of clay for modeling Types of clay and usages	**15**
II	**Creating 3D form with Plaster of Paris** ● Creation of simple 2D and 3D Potss using Plaster of Paris. ● Plaster of Paris and its behaviour Maintenance and durability of plaster of Paris (POP)	**25**

Evaluation Methodology

- Individuals daily performance
- ProjectReview: Mid Semester
- Project Submission: End of the Semester

BBFA157	**PRINTMAKING-I**	**0L:1T:4P**	**2 Credits**

Objectives

Printmaking is as ancient as human civilization. Print is about taking multiple impressions of similar objects or patterns. Print is a medium of expression used for communicating to masses. Students, in this module, will learn various types of printmaking techniques. They will also learn how prints are being created for the purpose of art and beauty. During this module, students will be able to understand the concept of print, its elements and principles involved in making a good print. Students will develop a sense of materials, methods and their usage.

Desired outcome of the course

From this module, students will be able to understand the concept of Printmaking. They will be able to make prints, taking ideas from objects in nature and their surroundings. They will learn different types of printing techniques and their usage in everyday life. They will be able to understand the quality of prints, inks, papers, and their behaviour when they are applied on different surfaces. It will help students to understand print as a medium of artistic expression. They will also be able to create blocks and print them accordingly.

BBFA157	**PRINTMAKING-I**	**0L:1T:4P**	**2 Credits**

Unit	**List of Practicals**	**Practical Hours**
I	**Making of mono prints with Linocut** ● Printing Techniques Exercise on creating a Linocut, mono print	**15**
II	**Making block print with objects selected at random in one's environment** ● Students will be encouraged to look for various objects around them and use their impressions as blocks for printing ● Students will collect objects of different textures both natural as well as man-made to use as blocks for printing	**10**
III	**Making a stencil print** ● Stencil and evolution of stencil printing ● Find stencils from everyday life	**15**

Evaluation Methodology

- Individuals daily performance
- Project Review: Mid Semester Project
- Submission: End of the Semester

BBFA158	**ART PROJECT-I**	**0L:1T:2P**	**2 Credits**

Objectives

An Art Project subject includes fostering creativity, enhancing technical skills in various art mediums, encouraging self-expression, and promoting critical thinking in art analysis. The course also aims to develop students' ability to conceptualise and execute original art projects while understanding the cultural and historical context of art.

Desired outcome of the course

The Art Project course is for students to develop their artistic voice, enhance technical skills, and gain a deep understanding of visual communication. Students should be able to create meaningful, original artwork that reflects critical thinking, creativity, and an appreciation for diverse artistic traditions and perspectives.

BBFA158	**ART PROJECT-I**	**0L:1T:2P**	**2 Credits**

Unit	**List of Practicals**	**Practical Hours**

I	**Creating 3d form with paper or cloth** ● Using paper and cloth to make different objects ● Creation of forms from simple to complex ● Behaviour and usage of materials Choosing appropriate material based on the object	**15**
II	**Creating 3d form with cardboard** ● Cardboard and its types ● Use of cardboard to create a 3D object Tools used in cardboard cutting ● Creating a 2D or 3D object with the help of cardboard	**15**
III	**Creating 3D form using Everyday Objects** ● Choose an everyday object. ● Create utility or decorative object using everyday object	**10**

Evaluation Methodology

- Individuals daily performance
- ProjectReview: Mid Semester
- Project Submission: End of the Semesters

BBFA201	FUNDAMENTAL OF WESTERN ART	2L:1T:0P	3 Credits

Objectives

The "Fundamentals of Art" course aims to introduce students to basic artistic principles, including the use of line, shape, colour, and form. It focuses on developing observational skills, fostering creativity, and understanding visual composition. The course prepares students to express ideas artistically and build a strong foundation for advanced art studies.

Desired outcome of the course

Through this module, students will grasp the significance and impact of art in their daily lives. It will deepen their understanding of art's role, embedding the concept of art within their consciousness. Students will be introduced to art from a broad and comprehensive perspective.

BBFA202	**ENGLISH FOR PROFESSIONAL COMMUNICATION**	**2L:1T:0P**	**3 Credits**

Objective of the Course:

To impart basic skills of communication in English through intensive practice to the first year UG students of engineering so as to enable them to function confidently and effectively in that language in the professional sphere of their life.

Desired Entry Behaviour:

The student must have some basic command of English that he must be able to:

Write reasonably grammatically.

Understand (if not use) at least some 2500 general-purpose words of English.

Use some 2000 (at least 1500) general-purpose words of English to express himself in writing and 1500 such words to talk about day to day events and experiences of life.

Understand slowly- delivered spoken material in Standard Indian English, and Speak Reasonably clearly (if not fluently) on routine matters with his fellow students.

BBFA202	**ENGLISH FOR PROFESSIONAL COMMUNICATION**	**2L:1T:0P**	**3 Credits**	**Teaching**

Method:

The topics must be covered essentially through plenty of examples; lecture classes must be conducted as lecture-cum-tutorial classes.

It is a course that aims to develop skills. Itis therefore ಯpracticaOರ in orientation plenty of exercises of various kinds must be done by the students both inside and outside the classroom.

The teacher must not depend on a single or a set of two or three textbooks. He must choose his materials from diverse sources.

Keeping in view the requirements of his students, the teacher may have to prepare some teaching and exercise materials.

For Practice in listening, good tape recorders can be used if the more advanced facilities (for example, language laboratory) are not available. In fact they can be used very fruitfully. The teacher must function as a creative monitor in the classroom.

Minimum time should be spent in teaching phonetic symbols, stress, information, etc. The aim should be to enable the student to find out for himself the correct pronunciation of s word from a learners dictionary. In teaching speaking, emphasis should be on clarity, intelligibility and reasonable fluency rather than no "correct" pronunciation of words. Classroom presentation and group discussion sessions should be used to teach speaking.

Key concepts

1. Language/Communication in context: communication as a means of sharing information, speakers-listener and reader-writer relationship, process, importance, purpose, features of communication (accuracy, brevity, clarity and appropriateness in communication), barriers to communication, personal and interpersonal communication.

2. Writing Skills: Learning words for general purpose, use through situations, sentence formation and use of given set of words in different contexts, usages of words in different tenses, aspect and moods, narrative in first, second and third person, meaning and usages of connectives, modifiers and models, phrasal verbs, connotations, various types of sentences and paragraphs, features of paragraph (cohesion and coherence).

3. Speaking Skills: Speech and verbal communication, articulation (pronunciation of different sounds and words i.e. vowels, consonants, diphthongs, (IPA Chart) and words), paralinguistic features, formal informal speaking, extempore, discussion and presentation.

4. **Reading Comprehension:** kinds and types of reading texts, basic steps to effective reading, abstracting, précis writing and summarising taking examples from different texts.

5. Listening Comprehension: process and types of listening, steps of listening, barriers to listening, Fluency & speed, impact of pronunciation on comprehension through various texts, intelligent listening.

Practice exercises I: vocabulary and conversation exercises on the newly learnt words, transcription of words, understanding of tenses, enhancing conversation skills, reading & listening Comprehension of simple passages with exercises

Practice exercises II: conceptual inputs on presentation skills and conducting presentations.

Note: 90 days of working/teaching (including internal assessment)

BBFA251	**FUNDAMENTALS OF DESIGN**	**0L:2T:4P**	**3 Credits**

Objectives

Design involves the strategic arrangement of forms and shapes within a given space to achieve a specific purpose. It is about harmonising different elements with the available space, creating a visually pleasing and balanced composition. Through the use of various articles, objects, and shapes, designers establish relationships that are aesthetically appealing to the viewer.

In this module, students will explore the fundamental concepts of design, including its core elements and the principles that contribute to effective design. The course is designed to cultivate an artist's sense of arrangement, movement, and visual harmony, helping them to create well-balanced and engaging compositions.

Desired outcome of the course

In this module, students will gain a comprehensive understanding of design concepts. They will learn how to draw inspiration from natural objects and their surroundings to create original designs. Students will explore various types of designs and their applications in everyday life, delving into the qualities of lines, shapes, and forms, and how these elements interact when placed in proximity. This knowledge will enable them to develop an intuitive sense of balance and rhythm in their designs. The module will also train students to refine their visual perception, ensuring that their hand and eye work in harmony to create cohesive and compelling pieces of art.

BBFA251	**FUNDAMENTALS OF DESIGN**	**0L:2T:4P**	**3 Credits**

Unit	**List of Practicals**	**Practical Hours**
I	**Composition using basic shapes** ● Composition using different types of forms in Mono colour ● Creation of forms in different colour ● Relationship of colour and form ● Exercises on creating a design in square format using basic geometric forms.	**15**

II	**Lines, forms and colours** ● Creation of a design using line, form and colours Implanting the above design into basic forms such as triangles, squares and circles. ● Using colour overlapping and transparency to create forms	**10**
III	**Line, Forms, Colours, tones and textures** ● Creation of a design using line forms, colours, tones and textures. ● Exercise to design using different objects available in the environment. ● Using colour overlapping and transparency to create forms.	**5**
IV	**Lettering, Calligraphy and Typography** ● Application of calligraphic styles for simple professional work. ● Typography Applications for simple communicative design. ● Expressive types, Characters of type, Grid system – type calculation.	**10**

Evaluation Methodology

- Individuals daily performance
- Project Review: Mid Semester
- Project Submission: End of the Semester

BBFA252	**INTRODUCTION TO COMPUTER GRAPHICS**	**0L:1T:4P**	**3 Credits**

Objectives

Computers are essential tools in today's world, making it crucial for students to acquire basic computer skills. This knowledge will lay the groundwork for future use of graphic applications and professional career development. For artists, mastering these skills is vital to keeping pace with modern technology. Students should become comfortable with using computers, enabling them to work with confidence and ease.

Desired outcome of the course

This module will equip students with an understanding of computer technology in the field of art. They will learn to operate computers and use them effectively for artistic purposes. Students will become familiar with various basic and graphic software commonly used for graphical representation.

BBFA252	**INTRODUCTION TO COMPUTER GRAPHICS**	**0L:1T:4P**	**3 Credits**

Unit	List of Practicals	Practical Hours
I	**Making PowerPoint presentation** ● Overview of Presentation ● Use of PowerPoint Different types of Slide Layouts Applying Background and Design Templates Transitions and Custom Animation Effects. ● Printing Slides	**10**
II	**Microsoft office** ● Making Office Document ● Formatting Documents ● Working with Page Setups, Tables and shapes ● Formatting Tables, Header and Footer ● Printing Procedures ● Spell Checker and Thesaurus	**5**

III	**Basics Networking** ● Introduction to Networks ● Advantages of Network ● Types of Network, Wireless, Bluetooth, Ethernet, VPN ● Cloud Computing ● Sharing devices, network	**5**
IV	**Introduction ADOBE PHOTOSHOP** ● new document, saving files, saving new and existing images, export, import, changing work canvas, rotating. ● Menu bar options ● ToolBar Options (Move tool, hand tool, zoom tool. Pencil and pen tool, crop tool, magic wand, lasso and eraser tools. Type tool) ● Colours, Layers and Filters (Background and foreground, Eyedropper-colour sampler, erasing, blending modes, gradients, working with brushes, Burn-dodge-sponge, Blur-sharpen- smudge) · ● Restoration of photos ((red eye tool, patch tool, clone stamp pattern stamp, spot healing brush tool, retouch tool, colour replacement tool). ● Photo enhancement and colour correction.	**20**

Evaluation Methodology

- Individuals daily performance
- Project Review: Mid Semester
- Project Submission: End of the Semester

BBFA253	**VISUALIZATION & REPRESENTATION- II**	**0L:1T:4P**	**3 Credits**

Objectives

Isometric projection is a technique for representing a 3D object from multiple perspectives, typically including front, side, and top views, allowing viewers to visualise the object from all angles. Orthographic drawings are particularly useful when a design is nearly ready for manufacturing. In this module, students will learn about different types of geometric planes and their applications. They will gain an understanding of orthographic projections, including their types, elements, and principles. The course will train students to effectively present 3D visuals on 2D surfaces.

Desired outcome of the course

This module will enable students to grasp the concepts of 2D and 3D projection. They will learn to create isometric projections of various objects and explore different types of planes and their relevance in both professional and everyday contexts. Additionally, students will gain an understanding of focal length, optics, and projections, and how these concepts relate to 2D objects.

BBFA253	**VISUALIZATION & REPRESENTATION-II**	**0L:1T:4P**	**3 Credits**

Unit	**List of Practicals**	**Practical Hours**
I	**Introduction to Geometry(3D)** ● Platonic solids ● Archmedian solids ● Metatron's Cube ● Merkabah Symbol	**10**
II	**Isometric Drawing** ● Isometric projection and its need ● Role of focal point and focal length ● Relationship to orthographic projection	**10**
III	**Parallel and Angular Perspective** ● Parallel and Angular perspective and its need ● Role of perspective in drawing ● Relationship between different types of projections	**20**

Evaluation Methodology

- Individuals daily performance
- Project Review: Mid Semester
- Project Submission: End of the Semester

BBFA254	**ELEMENTS & PRINCIPLES VISUAL PERCEPTION**	**0L:2T:4P**	**3 Credits**

Objectives

Drawing is the basis of any art course. The subject aims at establishing hand-eye coordination while drawing any object. During this module, the students are trained to understand the importance of proportion while drawing. This subject develops the sense of line, space and volume in the mind of an artist.

Desired outcome of the course

From this module students will be able to understand the concept of line. They will be able to draw the objects using different types of lines. Students exhibit the capacity to create volume with the help of lines and draw with an intuitive attitude. Synchronisation of hand and eye will be well established and students can work in tandem to create any piece of art.

BBFA254	**ELEMENTS & PRINCIPLES VISUAL PERCEPTION**	**0L:2T:4P**	**3 Credits**

Unit	List of Practicals	Practical Hours
I	**Sketching** ● Rapid sketches, Drawing intuitively ● Structural drawings Sketching	**10**
II	**Still Life Drawing** ● Drawing a still life using different objects of different sizes and shapes Concept of materials and shapes Drawn With light, shade and volume	**10**

III	**Drawing of Nature** ● Study of nature using lines ● Creating volume through lines ● Use of pressure to create the required effect of light and shade ● Draw, showing the effect of light, shade and volume	**10**
IV	**Drawing from model** ● Drawing a human figure with rapid speed ● Ideal proportions of human body ● Examples of drawings of great masters	**10**

Evaluation Methodology

- Individuals daily performance
- Project Review: Mid Semester
- Project Submission: End of the Semester

BBFA255	**PAINTING-II**	**0L:2T:4P**	**3 Credits**

Objectives

Painting involves applying colour and tone to a given space, and mastering this skill is crucial for any artist. Understanding colour and how to handle it accurately forms the foundation for artistic development. This course focuses on observing colours under various lighting conditions and analysing how changes in light intensity affect colour perception. The course aims to cultivate a sense of harmony and teach the use of opposite and complementary colours effectively.

Desired outcome of the course

In this module, students will learn the fundamental concepts of colour and how to work with various colours and mediums. They will gain the skills to paint effectively and observe colours under both natural and artificial light. Students will develop the ability to analyse and draw conclusions about how colours behave in different environments.

BBFA255	**PAINTING-II**	**0L:2T:4P**	**3 Credits**

Unit	**List of Practicals**	**Practical Hours**
I	**Painting from object using colours and tones** ● Draw and paint an object with water colours ● Colour and its behaviour ● Ways of using tones in creating an art object	**10**

II	**Landscape** ● Draw landscape and paint with watercolours ● Effect of light on properties of colours	**10**
III	**Transparency and opaqueness of colour** ● Draw a colour wheel, Meaning and types of colour wheel ● Understanding colour wheel in relation to nature and harmony among colours ● Overlapping, transparency and opacity of colours ● Importance of colours and tones Colour, hue and intensity	**10**
IV	**Use of opaque and tempera colours** ● Draw a still life in tempera and behaviour of colours in different opacities ● Use of colours to create volume and depth ● Effect of colours on moods	**10**

Evaluation Methodology

- Individuals daily performance
- Project Review: Mid Semester
- Project Submission: End of the Semester

BBFA256	**CLAY MODELING-II**	**0L:1T:2P**	**2 Credits**

Objectives

Art is to see an object in 2D as well as 3D perspective. Clay modelling will help the students to develop a three-dimensional vision. Students will be able to feel the objects and materials. This exercise is designed to develop a sense of proportion and volume in students.

Desired outcome of the course

In this module, students will be able to understand the concept of modelling and volume in the given time and space. They will be able to make 2D and 3D miniatures of objects available in nature and their surroundings. They will learn the different types of clays modelling and materials that are used for the same. They will develop skills to use the tools available, the quality of material, their behaviour, maintenance and durability. Their hand and eye will be synchronised with the proportion and volume of the object.

BBFA156	**CLAY MODELING-II**	**0L:1T:2P**	**2 Credits**

Unit	List of Practicals	Practical Hours
I	**Creating 3D form with clay** ● Creation of complex 3D sculptures in clay ● Usage and preparation of clay for modelingTypes of clay available ● Use of different types of clay for different purposes	**20**

II	**Creating 3D form with Plaster of Paris** ● Plaster of Paris and its behaviour ● Creation of complex 2D and 3D objects using Plaster of Paris. ● Maintenance and durability of plaster of Paris	**20**

Evaluation Methodology

- Project Submission: End of the Semester

BBFA257	**PRINT MAKING-II**	**0L:1T:4P**	**2 Credits**

Objectives

Printmaking is as ancient as human civilization. Print is about taking multiple impressions of similar objects or patterns. Print is a medium of expression used for communicating to masses. Students, in this module, will learn various types of printmaking techniques. They will also learn how prints are being created for the purpose of art and beauty. During this module, students will be able to understand the concept of print, its elements and principles involved in making a good print. Students will develop a sense of materials, methods and their usage.

Desired outcome of the course

From this module, students will be able to understand the concept of Printmaking. They will be able to make prints, taking ideas from objects in nature and their surroundings. They will learn different types of printing techniques and their usage in everyday life. They will be able to understand the quality of prints, inks, papers, and their behaviour when they are applied on different surfaces. It will help students to understand print as a medium of artistic expression. They will also be able to create blocks and print them accordingly.

BBFA257	**PRINT MAKING-II**	**0L:1T:4P**	**2 Credits**

Unit	List of Practicals	Practical Hours
I	**Making of mono woodcut print** ● Print and its origin, ● Printing techniques ● Exercise on creating a monoprint	**15**
II	**Making of woodcut print in colour** ● Woodcut colour printing process and tools Exercise on woodcut printing with colour	**10**
III	**Making a print with silk screen** ● Silkscreen colour printing process and tools ● Types of silk screen printing ● Exercise on silk screen printing with single and multi colour	**15**

Evaluation Methodology

- Individuals daily performance
- Project Review: Mid Semester Project
- Submission: End of the Semester

BBFA258	**ART PROJECT-II**	**0L:1T:2P**	**2 Credits**

Objectives

An Art Project subject includes fostering creativity, enhancing technical skills in various art mediums, encouraging self-expression, and promoting critical thinking in art analysis. The course also aims to develop students' ability to conceptualise and execute original art projects while understanding the cultural and historical context of art.

Desired outcome of the course

The Art Project course is for students to develop their artistic voice, enhance technical skills, and gain a deep understanding of visual communication. Students should be able to create meaningful, original artwork that reflects critical thinking, creativity, and an appreciation for diverse artistic traditions and perspectives.

BBFA258	**ART PROJECT-II**	**0L:1T:2P**	**2 Credits**

Unit	List of Practicals	Practical Hours
I	**Sculpting** ● Create a detailed sculpture for use in film, theatre, or events.	**10**

II	**Modelling** ● Design and creation of a detailed prop model, incorporating key elements of form, function, and aesthetics. Students will engage in the entire design process, from conceptualization to final production, using a combination of traditional and digital modelling techniques.	**10**
III	**Scenic Design** ● The Scenic Design project focuses on the creation and development of props used in a theatrical production. This project will give students hands-on experience in prop design, emphasising the importance of detail, material selection, and the overall contribution of props to the visual storytelling of a scene.	**10**
IV	**Prototype of Daily use objects** ● Design and create prototypes of daily use objects, focusing on functionality, aesthetics, and user experience in a design context.	**10**
