Note: Students may complete MOOCs offered through SWAYAM/NPTEL to earn additional credits in their Academic Bank of Credits**.**

Teaching–Learning: As Level 6.5 of NHEQF, the teaching–learning shall emphasize advanced theoretical knowledge, critical analysis, research orientation, innovation, problem-solving, independent learning, and the application of concepts through extensive uses of case studies, seminars, projects, and industry engagement.

SEMESTER 3

STRATEGIC MANAGEMENT

BMBF-301 **Course Credit: 3** **Total Hours: 40**

Course Objectives

1. Understand the fundamental concepts, models, and processes of strategic management.
2. Analyse the external and internal environments of organizations using relevant frameworks and tools.
3. Formulate effective business, corporate, and functional strategies based on situational analysis.
4. Evaluate and choose appropriate strategies using strategic analysis techniques.
5. Implement strategies effectively through structured programs and organizational alignment.
6. Evaluate strategic performance and apply controls to ensure strategic success and sustainability.

Course Contents

Module I Strategic Management & Corporate Governance (5 Hours)

Introduction: Meaning, nature, scope, and importance of strategy; Model of Strategic Management; Strategic Decision-Making Process. Corporate Governance: Composition of the Board; Role and Responsibilities of the Board of Directors; Trends in Corporate Governance; Corporate Social Responsibility (CSR**). Case Studies and Latest Updates**.

Module II: Models of Environmental Scanning (9 Hours)

Environmental Scanning**:** Understanding the Macro Environment: PESTEL Analysis; Industrial Organization (IO) & the Structure Conduct Performance (SCP) Approach; Porter's Five Forces Model; Understanding the Micro Environment: Resource-Based View (RBV) Analysis; VRIO Framework; Using Resources to Gain Competitive Advantage & its Sustainability; Value Chain Analysis. **Case Studies and Latest Updates.**

Module III: Strategy Formulation (10 Hours)

Strategy Formulation: Situational Analysis using SWOT Approach. Business Strategies: Competitive Strategy – Cost Leadership, Differentiation & Focus; Cooperative Strategy – Collusion & Strategic Alliances. Corporate Strategies: Directional Strategy – Growth Strategies, Stability Strategies & Retrenchment Strategies; Corporate Parenting. Functional Strategies: Marketing, Financial, R&D, Operations, Purchasing, Logistics, HRM & IT. The Sourcing Decision: Outsourcing & Offshoring. **Case Studies and Latest Updates**.

Module IV: Strategy Implementation (10 Hours)

Strategy Choice and Analysis: Scenario Analysis Process; Tools & Techniques of Strategic Analysis: BCG Matrix; Ansoff Grid; GE Nine Cell Planning Grid; McKinsey's 7'S Framework. Strategy Implementation: Developing Programs, Budget and Procedures; Stages of Corporate Development; Organizational Life Cycle; Organizational Structures: Matrix, Network & Modular/Cellular; Reengineering and Strategy Implementation; Leadership and Corporate Culture. **Case Studies and Latest Updates.**

Module V: Strategy Evaluation and Control (6 Hours)

Strategy Evaluation & Control: Evaluation & Control Process; Measuring Performance: Types of Controls; Activity-Based Costing; Enterprise Risk Management; Primary Measures of Corporate Performance; Balanced Scorecard Approach to Measure Key Performance; Responsibility Centers; Benchmarking; Problems in Measuring Performance & Guidelines for Proper Control. Strategic Audit of a Corporation**; Case Studies and Latest Updates**.

Suggested Readings(Latest Edition)

1. Wheelen, L. Thomas and Hunger, David J.; *Concepts in Strategic Management and Business Policy*; Pearson Education.

2. Stewart Clegg, Chris Carter, Martin Kornberger & Jochen Schweitzer; *Strategy – Theory and Practice*; SAGE Publishing India.
3. Kazmi, Azhar; *Business Policy and Strategic Management*; McGraw-Hill Education.
4. David, Fred; *Strategic Management: Concepts and Cases*; PHI Learning.
5. Thomson, Arthur A. and Strickland, A. J.; *Strategic Management: Concept and Cases*; McGraw-Hill Education.
6. Jauch, L. F. and Glueck, W. F.; *Business Policy and Strategic Management*; McGraw-Hill Education.

Course Outcomes and Bloom's K-Level Mapping

CO No.	Course Outcome Statements	Bloom's K-Levels
CO1	Define and explain the fundamental concepts, models, and processes of strategic management.	**K2: Understanding**
CO2	Analyse external and internal environments using various frameworks to assess organizational positioning.	**K4: Analysing**
CO3	Apply situational analysis techniques to formulate competitive, corporate, and functional strategies in diverse business contexts.	**K3: Applying**
CO4	Evaluate strategic options using analytical tools for informed strategy choice.	**K5: Evaluating**
CO5	Design and develop strategic implementation plans for effective strategy execution.	**K6: Creating**

FINANCIAL CREDIT AND RISK ANALYSIS

BMBF-302 **Course Credit: 3** **Total Hours: 40**

Course Objectives

1. Understand the fundamentals of risk management, its context, and the prevailing perceptions and stereotypes associated with it.
2. Apply risk management principles as an enabler for effective decision-making and business performance.
3. analyse the role of risk culture in integrating risk management into organizational processes.
4. Evaluate how effective risk management contributes to sustainable competitive advantage.
5. Develop a proactive risk culture that positions risk management as a strategic enabler of business success.

Course Contents

Module I: Introduction (6 Hours)

Financial Credit: Meaning & Objectives; Credit Risk; Credit Analysis; Seven C's; Credit Analysis Process; Credit Process; Documentation; Loan Pricing and Profitability Analysis; Regulations. Types of Credit Facilities: Various Types of Credit Facilities – Cash Credit; Overdrafts; Demand Loan; Bill Finance – Drawee Bill Scheme; Bill Discounting. Cash Delivery: Types of Facilities; Modes of Delivery.

Module II: Trade Credit Risk (8 Hours)

Sole Banking Arrangement; Multiple Banking Arrangement; Consortium Lending; Syndication; Credit Thrust; Credit Priorities; Credit Acquisitions; Statutory & Regulatory Restrictions on Advances. Credit Appraisal: Validation of Proposal; Dimensions of Credit Appraisals; Structuring of Loan Documents; Credit Risk; Credit Risk Rating; Credit Worthiness of Borrower; Purpose of Loan; Source of Repayment; Cash Flow; Collateral.

Module III: Letter of Credit and Loan Commitments (10 Hours)

Quasi Credit Facilities: Advantages of Non-Fund Facilities; Various Types of NFB Facilities; Various Types of Letters of Credit; Assessment of LC Limits; Bills Purchase/Discounting under LC; Loan Commitments; Un-funded Lines of Credit and their Characteristics. Various Types of Bank Guarantees: Performance Guarantee; Financial Guarantees; Deferred

Payment Guarantees; Types of Performance and Financial Guarantees; Assessment of Bank Guarantee Limits; Period of Claim under Guarantee.

Module IV: Operational Risk Overview (8 Hours)

Risk & Uncertainty; Financial Sector; Risk Types. Operational Risk Management: Recruitment & Training; Work Flow Design; Work Flow Documentation; Delegation of Authority; Independent Internal Audit; Independent Compliance Function; Independent Risk Management Function; System Audit; Corporate Governance; Whistle Blower Policy; Risk Management Culture.

Module V: Credit Analysis & Rating (8 Hours)

Credit Analysis: Importance of Credit Analysis; Stages of Credit Analysis; Profitability Analysis and Pricing of Loans; Credit Risk Analysis (Debt Ratios and Risk of Leverage); Analysis of Working Capital; Liquidity; Operating and Cash Cycle Risk. Credit Rating: Measurement of Risk; Objective of Rating; Internal & External Rating; Model Credit Rating; Methodology of Rating; Internal & External Comparison; Model Rating Formats.

Activities

1. **Case Analysis:** Students will analyze a loan proposal and assess the borrower's creditworthiness using the principles of credit appraisal.
2. **Balance Sheet Analysis:** Students will analyze a company's balance sheet to evaluate its financial position, liquidity, solvency, and creditworthiness.
3. **Ratio Analysis:** Students will calculate and interpret key financial ratios to assess credit risk and repayment capacity.
4. **Group Discussion:** Students will discuss different types of credit facilities, letters of credit, bank guarantees, and operational risk management practices.
5. **Presentation:** Students will prepare and deliver a presentation on credit rating methods, operational risk management, or loan pricing and profitability analysis.

2. Chance; *Introduction to Derivatives & Risk Management*; Cengage Learning, New Delhi.
3. Saita, F.; *Value at Risk and Bank Capital Management* (1st Edition); Elsevier Inc., U.K.
4. Rejda, George E.; *Principles of Risk Management and Insurance*; Addison Wesley Longman.
5. McNamara; *Principles of Risk Management and Insurance*; Addison-Wesley.
6. Dorfman; *Introduction to Risk Management and Insurance*; Prentice Hall.
7. Williams & Heins; *Risk Management and Insurance*; McGraw-Hill.
8. James S. Treischmann & Sandra G. Gustavson; *Risk Management and Insurance*; South-Western Thomson Learning.
9. Parthasarathy; *Corporate Governance: Principles, Mechanisms & Practice*; Wiley

Course Outcomes and Bloom's K-Level Mappings

CO No.	Course Outcome Statements	Bloom's K-Levels
CO1	Understand the fundamental principles of financial credit, credit assessment, and credit analysis.	**K2: Understanding**
CO2	Analyse credit risk, creditworthiness, and credit risk rating techniques.	**K4: Analysing**
CO3	Apply credit appraisal techniques, loan commitments, letters of credit, and bank guarantees in financial decision-making.	**K3: Applying**
CO4	Evaluate operational risk management practices, corporate governance, and risk mitigation strategies.	**K5: Evaluating**
CO5	Develop effective credit strategies and risk management frameworks to measure and manage portfolio risk for sustainable financial performance.	**K6: Creating**

TAX PLANNING & MANAGEMENT

BMBF-303 **Course Credit: 3** **Total Hours: 40**

Course Objectives

1. Understand the principles, structure, and key issues related to different types of taxes in the Indian economy.
2. Apply tax policies and provisions in evaluating personal and corporate tax obligations.
3. analyse the role of taxation in promoting economic growth and industrial development.
4. Evaluate the impact of direct and indirect taxes, including GST, on corporate decision-making and financial planning.
5. Develop the ability to design tax-efficient strategies that align with legal provisions and contribute to sound fiscal management.

Course Contents

Module I: Fundamental Concepts (6 Hours)

Introduction: Definition; Cannons of Taxation; Person; Assessee; Income; Previous Year; Assessment Year; Income Tax; Important Dates and Forms. Residential Status & Tax Incidence: Individual; Income Exempted from Tax.

Module II Heads of Income and Provisions (10 Hours)

Heads of Income: Salaries; Income from House Property; Profits & Gains from Business or Profession; Capital Gains; Income from Other Sources. Clubbing of Incomes; Calculation of Taxable Income; Tax Calculation including Surcharge and Marginal Relief; Deduction; Rebate; Relief; Set-off & Carry Forward of Losses – Principles; Meaning; Inter-source & Inter-head Set-off.

Module III: Tax Planning & Management (8 Hours)

Tax Avoidance; Tax Planning; Tax Evasion. Income Tax Authorities: Their Appointment; Jurisdiction; Powers and Functions. Tax Administration: Provisions relating to Collection and Recovery of Tax; Refund of Tax; Offences; Penalties and Prosecutions; Appeals and Revisions; Advance Tax; Tax Deducted at Source (TDS); Advance Rulings; Avoidance of Double Taxation Agreements (DTAA).

Module IV: Corporate Tax (6 Hours)

Computation of Taxable Income; Carry-forward and Set-off of Losses for Companies; Minimum Alternative Tax (MAT); Set-off and Carry-forward of Amalgamation Losses; Tax Planning for Amalgamation, Merger and Demerger of Companies; Tax Provisions for Venture Capital Funds.

Module V: Goods and Services Tax (GST) (10 Hours)

Introduction to GST: GST Concepts; Advantages and Limitations of VAT; GST as the Preferred Tax Structure; Model of GST; Need for Tax Reforms; GST Principles – Single GST and Dual GST; Transactions Covered under GST; Impact of GST. Registration and Filing: Rates of Tax; Rates in Foreign Countries and India; Assessment and Administration of GST.

CO4	Apply corporate tax provisions in computing taxable income and taxation related to business restructuring, amalgamation, merger, and demerger.	**K3: Applying**
CO5	Apply GST provisions for registration, tax computation, assessment, filing, and effective GST management.	**K3: Applying**

INVESTMENT AND PORTFOLIO MANAGEMENT

BMBF-304 **Course Credit: 3** **Total Hours: 40**

Course Objectives

1. Understand the fundamental concepts of investment theory and their application in portfolio selection and management.
2. Apply appropriate financial models and formulae to solve business problems related to active portfolio management.
3. analyse securities using various tools and techniques to assess risk-return trade-offs and investment performance.
4. Evaluate different investment avenues and portfolio strategies to enhance returns and manage risks effectively.
5. Develop the ability to construct and manage efficient portfolios by integrating theoretical knowledge with practical insights.

Course Contents

Module I: Investments (10 Hours)

Overview of Capital Market: Market of Securities; Stock Exchange and New Issue Markets – Nature, Structure, Functioning and Limitations. Trading of Securities: Equity and Debentures/Bonds; Securities Trading – Types of Orders; Margin Trading; Clearing and Settlement Procedures. Regulatory Systems for Equity Markets: Types of Investors; Aim and Approaches of Security Analysis.

Module II: Portfolio Theory (8 Hours)

Risk and Return: Concept of Risk; Components and Measurement of Risk; Covariance; Correlation Risk; Fundamental Coefficient; Measurement of Systematic Risk. Fundamental Analysis: Economic Analysis; Industry Analysis; Company Analysis. Portfolio Risk and Return: Beta as a Measure of Risk; Calculation of Beta. Selection of Portfolio: Markowitz's Theory; Single Index Model. **Case Studies**.

Module III: Capital Market & Asset Pricing (6 Hours)

Technical Analysis: Dow Theory; Support and Resistance Levels; Types of Charts and their Interpretation; Trend Lines; Gap Wave Theory; Relative Strength Analysis; Technical versus Fundamental Analysis. Nature of Stock Markets: Efficient Market Hypothesis (EMH) and its Implications for Investment Decisions. Asset Pricing Models: Capital Market Theorem; Capital Asset Pricing Model (CAPM); Arbitrage Pricing Theory (APT); **Case Studies.**

Module IV: Bond, Equity and Derivative Analysis (8 Hours)

Valuation of Equity: Discounted Cash Flow Techniques; Balance Sheet Valuation; Dividend Discount Models; Intrinsic Value and Market Price; Earnings Multiplier Approach; P/E Ratio; Price/Book Value; Price/Sales Ratio; Economic Value Added (EVA). Valuation of Debentures/Bonds: Nature of Bonds; Bond Valuation; Bond Theorem; Term Structure of Interest Rates. Derivative Analysis: Meaning; Features; Types of Derivatives; Role and Significance of Derivatives in

Financial Markets; Participants in Derivative Markets – Hedgers, Speculators and Arbitrageurs; Regulatory Framework of Derivative Markets.

Module V: Active Portfolio Management (8 Hours)

Portfolio Management and Performance Evaluation: Performance Evaluation of Existing Portfolio; Sharpe Measure; Treynor Measure; Jensen Measure; Finding Alternatives and Revision of Portfolio; Portfolio Management and Mutual Fund Industry; **Case Studies.**

DEPOSITORY OPERATIONS

BMBF-305 **Course Credit: 3** **Total Hours: 40**

Course Objectives

1. Understand the role and functions of depositories in financial markets.
2. Examine the legal and regulatory framework governing depository operations.
3. Learn about various depository services such as dematerialization and securities settlement.
4. Explore the clearing and settlement processes involved in depository operations.
5. Understand the mechanisms in place to protect investor interests and ensure corporate governance in depository operations.

Course Contents

Module I: Introduction to Depositary Operations (8 Hours)

Role and Importance of Depositary Operations; Types of Financial Assets Held by Depositories; Regulatory Framework and Industry Standards; Overview of Securities Settlement and Custody Services; Depository Ecosystem: Interaction with Exchanges, Clearing Corporations, Custodians, Registrars, and Transfer Agents

Module II: Securities Settlement and Clearing (8 Hours)

Clearing and Settlement Processes for Securities; Roles and Responsibilities of Parties Involved in the Settlement Process; Settlement Methods – Delivery versus Payment (DVP), Free of Payment (FOP), etc.; Risk Management in Securities Settlement.

Module III Custody Services and Asset Protection (8 Hours)

Safekeeping and Physical Protection of Securities; Corporate Actions and their Impact on Custody Services; Securities Lending and Borrowing; Asset Reconciliation and Valuation; ESG-related Corporate Actions and Stewardship Responsibilities; Collateral Management and Margin Processing; Artificial Intelligence Applications in Custody Operations

Module IV: Asset Servicing and Fund Administration (8 Hours)

Income Collection and Distribution; Proxy Voting and Shareholder Communication; Tax Reclamation and Withholding Tax Management; Net Asset Value (NAV) Calculation; Fund Accounting.

Module V: Compliance and Risk Management in Depositary Operations (8 Hours)

Legal and Regulatory Requirements for Depositories; Know Your Customer (KYC) and Anti-Money Laundering (AML) Compliance; Risk Assessment and Mitigation Strategies; Technology and Automation in Depositary Operations; Data Privacy Regulations and Governance.

Suggested Readings(Latest Edition)

1. Michael Simmons; *Securities Operations: A Guide to Trade and Position Management*.
2. David Loader; *Custody and Securities Services: Global Securities Processing and Fund Services*.
3. Committee on Payment and Settlement Systems (CPSS); *Securities Settlement Systems: Design, Governance, and Oversight*.
4. Regulatory Guidelines and Industry Reports from Relevant Authorities.
5. Online Platforms and Databases for Accessing Industry News and Research Papers.

FINANCIAL MARKETS AND SERVICES

BMBF-306 **Course Credit: 3** **Total Hours: 40**

Course Objectives

1. Understand the structure, functions, and regulatory framework of financial markets and financial services.
2. analyse the functioning of money, capital, commodity, debt, and international financial markets.
3. Apply knowledge of financial instruments, financial services, and digital technologies in financial decision-making.
4. Evaluate the impact of emerging technologies such as Artificial Intelligence (AI), Blockchain, FinTech, ESG investing, and Digital Banking on financial markets.
5. Develop the ability to analyse financial market trends and design sustainable investment and financial service strategies.

Course Contents

Module I: Overview of Financial Markets and Financial Services (7 Hours)

Financial Markets – Nature, Functions and Classification; Money Market; Capital Market; Derivatives Market; Foreign Exchange Market; Role and Functions of Financial Services; Working of Stock Exchanges in India; National Stock Exchange (NSE); Bombay Stock Exchange (BSE); Role of SEBI; Major International Stock Exchanges; Introduction to FinTech and Digital Transformation in Financial Markets.

Module II: Commodity, Debt and Digital Financial Markets (7 Hours)

Commodity Markets – MCX, NCDEX and ICEX; Functions, Administration, Regulations and Trading Mechanism; International Commodity Markets. Debt Market – Types, Functions, Instruments and Operational Mechanism; Corporate Bond Market; Government Securities Market; Green Bonds and Sustainable Bonds; Digital Payment Systems (UPI, NEFT, RTGS, IMPS); Digital Banking; Payment Banks and Small Finance Banks.

Module III: Financial Instruments, Investment Products and Emerging Technologies (10 Hours)

Financial Instruments – Equity Shares, Preference Shares, Debentures, Bonds, Mutual Funds, Exchange Traded Funds (ETFs), Derivatives and Structured Products. Issue of Financial Instruments – Primary Issue; Book Building Process; Private Placement; Offer for Sale; Buy-back of Shares. Blockchain Technology in Financial Markets; Bitcoin and Cryptocurrencies; Central Bank Digital Currency (CBDC); Tokenization of Securities; Smart Contracts; Artificial Intelligence (AI) and Machine Learning Applications in Financial Markets; Robo-advisory Services; Regulatory Issues in Digital Assets.

Module IV: Financial Institutions and Modern Financial Services (9 Hours)

Development Financial Institutions – IFCI, NABARD, SIDBI, State Financial Corporations (SFCs). Financial Services – Merchant Banking, Mutual Funds, Venture Capital, Leasing, Factoring, Forfaiting, Credit Rating Agencies, Depository Services (NSDL & CDSL), Insurance Services, Pension Funds (PFRDA), Asset Management Companies (AMCs). RegTech (Regulatory Technology); SupTech; AI-enabled Financial Services; WealthTech; InsurTech; Digital Lending Platforms.

Module V: Global Financial Markets, ESG and Sustainable Finance (7 Hours)

International Financial Instruments – ADR, GDR, IDR and Euro Bonds. Role of Foreign Capital in the Indian Financial System; Trends in Foreign Capital Inflows; Regulatory Framework for Foreign Capital Flows. Environmental, Social and Governance (ESG) Investing; Sustainable Finance; Green Finance; Climate Finance; ESG Reporting Standards; Responsible Investing; International Financial Market Trends; Cyber Security in Financial Services; Future of Financial Markets and Services.

CUSTOMER RELATIONSHIP MANAGEMENT IN BFSI

BMBF-307 **Course Credit: 3** **Total Hours: 40**

Course Objectives

1. Understand the fundamental concepts and principles of Customer Relationship Management (CRM) and its significance in the Banking, Financial Services, and Insurance (BFSI) sector.
2. analyse customer relationship strategies and customer-centric approaches for enhancing customer acquisition, engagement, retention, and loyalty in BFSI.
3. Apply CRM tools, digital technologies, and analytics to improve customer experience and service quality in financial institutions.
4. Evaluate CRM practices, customer value management, and regulatory aspects to support sustainable business growth in BFSI.
5. Develop innovative CRM strategies by integrating Artificial Intelligence (AI), data analytics, digital banking, and emerging technologies in the BFSI sector.

Course Contents

Module I: Fundamentals of Customer Relationship Management in BFSI (8 Hours)

Concept, Evolution and Importance of CRM; CRM in Banking, Financial Services and Insurance; Customer-Centric Organization; CRM Process; Customer Life Cycle; Customer Expectations and Satisfaction; Customer Value and Customer Lifetime Value (CLV); Service Quality in BFSI; Digital Transformation in Customer Relationship Management.

Module II: Customer Segmentation and Relationship Management Strategies (8 Hours)

Customer Segmentation – Demographic, Geographic, Behavioral and Psychographic Segmentation; Customer Profiling; Customer Acquisition; Customer Onboarding; Cross-selling and Up-selling; Customer Retention Strategies; Customer Loyalty Programs; Customer Complaint Management; Omnichannel Customer Engagement; Relationship Marketing in BFSI.

Module III: CRM Analytics in BFSI (8 Hours)

Introduction to CRM Analytics; Customer Data Management; Customer Data Warehousing; Data Mining for CRM; Customer Profitability Analysis; Customer Lifetime Value (CLV) Analytics; Predictive Analytics; Customer Churn

Analysis; Cross-sell and Up-sell Analytics; Customer Satisfaction Measurement; AI and Machine Learning Applications in CRM; Dashboards and Business Intelligence for CRM Decision-Making.

Module IV: CRM Technology and Digital Innovation in BFSI (8 Hours)

CRM Software and Platforms; CRM Databases; Integration of CRM with Core Banking Systems, Digital Banking Channels and Customer Service Platforms; Cloud CRM; Mobile CRM; FinTech Applications; Artificial Intelligence (AI), Chatbots and Virtual Assistants; Robotic Process Automation (RPA); Blockchain Applications in Customer Service; Data Privacy, Cyber Security and Regulatory Compliance in CRM Systems.

Module V: Strategic CRM and Emerging Trends in BFSI (8 Hours)

Strategic CRM Planning; CRM Performance Measurement; Customer Experience Management (CEM); Service Recovery Strategies; Ethical Issues in CRM; Regulatory Framework for Customer Protection; ESG (Environmental, Social and Governance) and Customer Trust; Digital Customer Experience; Future Trends in CRM; Open Banking; Hyper-personalization; Case Studies on CRM Best Practices in BFSI.

Activities

a. Case studies on CRM practices in banks, insurance companies, NBFCs, and financial institutions.
b. Hands-on analysis of CRM dashboards and customer analytics tools.
c. Demonstration of AI-enabled CRM systems, chatbots, and digital banking platforms.
d. Presentation on CRM analytics, predictive modelling, and customer churn analysis.
e. Seminar on emerging trends including AI, Blockchain, ESG, Open Banking, and Hyper-personalization in CRM.

CO No.	Course Outcome Statements	Bloom's K-Levels
CO1	Explain the concepts, principles, and importance of Customer Relationship Management in the BFSI sector.	**K2: Understanding**
CO2	Apply customer segmentation, relationship management, and customer engagement strategies to improve customer satisfaction and loyalty.	**K3: Applying**
CO3	analyse customer data using CRM analytics, predictive models, and AI-enabled tools to support customer-centric decision-making.	**K4: Analysing**
CO4	Evaluate CRM technologies, digital innovations, and performance metrics to enhance customer experience and organizational effectiveness.	**K5: Evaluating**
CO5	Design strategic CRM initiatives by integrating AI, CRM analytics, Blockchain, ESG, and emerging digital technologies in BFSI organizations.	**K6: Creating**

SUMMER TRAINING PROJECT REPORT AND VIVA VOCE

BMBF-351 **Course Credit: 4**

Guidelines & Evaluation

1. After the completion of the First year (Second Semester), each student shall undergo an Internship of 6–8 weeks in a manufacturing, service, financial, government, start-up, NGO, or any other approved organization. The internship shall be evaluated, and the credits shall be awarded in the Seventh Semester.
2. The internship shall provide students with practical exposure to organizational operations, managerial practices, and a live business problem/project.
3. One supervisor of the organisation will be assigned under which the student will complete the internship. A faculty guide from department will also be assigned to monitor the progress of the internship through periodic reviews and interaction with the student and organization.
4. During the internship, the student will study functioning of the organisation and the organization shall assign a project/problem as appropriate to the organizational requirements.
5. Students shall maintain a Daily Work Diary/Internship Logbook duly certified by the supervisor of the organisation. It will be submitted with Internship Project Report
6. On completion of the internship, the student shall submit an Internship Project Report to the department on or before September 30 along with certificate of completion of internship from organisation.
7. The report shall include organizational profile, products & services, project objectives, methodology, analysis, findings, recommendations, limitations, and conclusions.
8. The report shall be prepared using A4 size paper, 12-point Times New Roman, 1.5 line spacing, and should ordinarily contain 80–100 pages, excluding annexures.
9. The report shall include:
    a. Cover Page
    b. Certificate from the Organization
    c. Certificate from Faculty Guide
    d. Declaration by the Student
    e. Acknowledgement
    f. Executive Summary
    g. Table of Contents
    h. List of Tables/Figures
    i. Chapters
    j. References (APA Style)
    k. Annexures
11. After completion of internship, every student shall make a formal presentation before the class and internal panel of faculty member.

Evaluation

1. The Internship shall carry a total of 100 marks. Out of these, 70 marks shall be awarded through external evaluation conducted jointly by two examiners—one External Examiner and one Internal Examiner. The External Examiner shall be appointed by the University. The external evaluation shall comprise:
    - Evaluation of the Internship Project Report, and
    - Viva Voce Examination.

    The final external evaluation marks shall be the average of the marks awarded by the two examiners.
2. The remaining 30 marks shall constitute the Internal Assessment as sessional, which shall be awarded by the Faculty Guide (Internal) based on the student's presentation and performance before the class.
3. The suggestive parameters for the external evaluation (70 marks) shall include the student's understanding of the organization, understanding of the objectives, relevance of the problem/project assigned, quality of the internship project report, and performance in the Viva Voce examination.

Course Outcomes (COs) with Bloom's K-Levels Mapping

CO No.	Course Outcome Statements	Bloom's K-Level
CO1	Explain organizational structure, business processes, and managerial practices observed during the internship.	**K2: Understanding**
CO2	Apply management theories, analytical tools, and professional skills to address organizational problems.	**K3: Applying**
CO3	analyse business situations using appropriate research methodologies and data analysis techniques.	**K4: Analysing**
CO4	Evaluate alternative solutions and recommend practical strategies for organizational improvement.	**K5: Evaluating**
CO5	Develop a comprehensive internship project report and effectively present findings through professional presentation and Viva Voce.	**K6: Creating**

EMPLOYABILITY & CAREER PLANNING

BMBF 352 **Course Credit: Nil** **Total Hours: 30**

(IT IS A MANDATORY NON-CREDIT COURSE. STUDENT MUST COMPLETE AND QUALIFY IT AS A PART OF THE ACADEMIC CURRICULUM)

Course Objectives

1. Develop self-awareness, leadership qualities, and professional competencies required for managerial success.
2. Enhance communication, analytical, critical thinking, and decision-making skills for business environments.
3. Strengthen employability through career planning, aptitude development, presentation skills, and placement readiness.
4. Foster ethical leadership, teamwork, corporate professionalism, and social responsibility.
5. Prepare students for successful careers through experiential learning, industry interaction, and reflective professional development.

Course Content and Activities

Sl. No.	Course Content	Activities / Exercises
1	Self-Leadership and Personality Development	SWOT Analysis, Johari Window Exercise, Goal Setting Workshop, Reflective Journal
2	Career Planning and Goal Setting	Career Vision Mapping, Career Interest Inventory, Individual Development Plan (IDP), Skill Gap Analysis
3	Professional Communication and Interpersonal Skills	Business Communication Exercises, Public Speaking, Elevator Pitch, Active Listening, Conflict Management, Negotiation Activities, Group Discussion
4	Aptitude and Reasoning	Quantitative Aptitude Practice, Logical Reasoning Exercises
5	Analytical Skills	Data Interpretation Exercises, Online Assessment Practice
6	Business Presentation Skills	Presentation Design, Storytelling Techniques, Data Visualization, Presentation and Analysis of Latest Business and Economic Developments
7	Executive Presentation	Team Case Presentation with Recommendations to Management Panel, Boardroom Meeting Simulation, Extempore/Impromptu Speaking
8	Critical Thinking and Decision Making	Case Analysis, Decision Tree Exercise, Business Simulation, Fishbone Diagram, Six Thinking Hats
9	Managerial Dilemma Simulation	Activities on Conflicting Priorities (Cost vs. Quality, Speed vs. Accuracy, Profit vs. Sustainability), Ethical Decision-Making Scenarios

Sl. No.	Course Content	Activities / Exercises
10	Resume Building and Personal Branding	Resume Writing Workshop, LinkedIn Profile Development, Personal Branding, Video Resume
11	Placement Readiness	Aptitude Test, Group Discussion, Mock Interview
12	Time Management and Personal Effectiveness	Time Audit, Priority Management Exercises, Productivity Tools, Stress Management Techniques, Work–Life Balance Activities
13	Corporate Immersion	Industry Expert Lecture, Alumni Interaction, Industrial Visit
14	Social Innovation and Leadership Challenge	Community Service Activity, ESG Case Study, Policy Design Exercise
15	Career Portfolio Presentation	A presentation on Learning Outcomes and Career Reflection.

Assessment Guidelines

a. **Class Test (CT)-20 Marks:** Based on Quantitative Aptitude, Verbal Ability, Data Interpretation, Logical Reasoning, and General Employability Skills as written tests.
b. **Teacher Assessment (TA)-10 Marks:** Based on attendance, classroom participation, punctuality, and active engagement in activities.
c. **Practical Sessional (PS)-70 Marks:** Based on communication skills, professionalism, career portfolio preparation and presentation, resume/CV development, mock interview performance, and overall career readiness.

Course Outcomes (COs) with Bloom's K-Levels Mapping

CO No.	Course Outcome Statements	Bloom's K-Level
CO1	Demonstrate self-awareness, professional ethics, leadership qualities, and interpersonal effectiveness in managerial contexts.	**K3: Applying**
CO2	Apply communication, analytical, presentation, and reasoning skills to solve professional and managerial problems.	**K3: Applying**
CO3	analyse business situations using critical thinking, decision-making tools, and managerial judgment.	**K4: Analysing**
CO4	Evaluate career opportunities, organizational expectations, and professional development strategies for employability.	**K5: Evaluating**
CO5	Develop a comprehensive career portfolio demonstrating professional competencies, industry readiness, lifelong learning, and personal branding.	**K6: Creating**

SEMESTER 4

UNIVERSAL HUMAN VALUES AND PROFESSIONAL ETHICS

Course Code: BMBF-401 **Credits: 3** **Total Contact Hours: 40**

Course Objectives

1. To help students distinguish between values and skills, and understand the need, basic guidelines, content and process of value education.
2. To help students initiate a process of dialog within themselves to know what they 'really want to be' in their life and profession.
3. To help students understand the meaning of happiness and prosperity for a human being.
4. To facilitate the students to understand harmony at all the levels of human living, and live accordingly.
5. To facilitate the students in applying the understanding of harmony in existence in their profession and lead an ethical life.

Course Outcomes

Upon successful completion of the course, students will be able to:

1. Understand the significance of value inputs in a classroom, distinguish between values and skills, understand the need, basic guidelines, content and process of value education, explore the meaning of happiness and prosperity, and make a correct appraisal of the current scenario in society.
2. Distinguish between the Self and the Body, understand the meaning of harmony in the Self, and the co-existence of Self and Body.
3. Understand the value of harmonious relationships based on trust, respect and other naturally acceptable feelings in human-human relationships, and explore their role in ensuring a harmonious society.
4. Understand harmony in nature and existence, and work out their mutually fulfilling participation in nature.
5. Distinguish between ethical and unethical practices, and develop strategies to actualize a harmonious environment in their profession and workplace.

Course Description

Every human being has two sets of questions to answer for life: (a) *What to do?* and (b) *How to do it?* The first pertains to the value domain, while the second relates to the skill domain. Both are complementary; however, the value domain has a higher priority. Today, education has become increasingly skill-oriented, often overlooking the fundamental human aspiration to live with happiness and prosperity despite significant technological advancement. This course aims to provide value-based inputs that help students develop right understanding and right feelings in their personal and professional lives, enabling them to lead an ethical life. Students learn the process of self-exploration, understand the distinction between the Self and the Body, appreciate naturally acceptable feelings in relationships, comprehend the comprehensive human goal in society, recognize mutual fulfillment in nature, and understand co-existence in existence. As a natural outcome, students become capable of evaluating and practising ethical living and professional conduct.

Course Contents

Unit I: Course Introduction – Need, Basic Guidelines, Content and Process for Value Education *(8 Hours)*

- Understanding the need, basic guidelines, content and process for Value Education.
- Self-Exploration—what it is, its content and process.
- "Natural Acceptance" and "Experiential Validation" as mechanisms for self-exploration.
- Continuous Happiness and Prosperity—A look at basic human aspirations.
- Right understanding, relationships and physical facilities as the basic requirements for fulfillment of human aspirations with their correct priority.
- Understanding happiness and prosperity correctly—A critical appraisal of the current scenario.
- Method to fulfill human aspirations through understanding and living in harmony at various levels.

UNIT II: Understanding Harmony in the Human Being – Harmony in Myself *(8 Hours)*

- Understanding the human being as a co-existence of the sentient "I" and the material "Body".
- Understanding the needs of the Self ("I") and the Body—*Sukh* and *Suvidha*.
- Understanding the Body as an instrument of the Self ("I" being the doer, seer and enjoyer).
- Understanding the characteristics and activities of the Self and harmony within the Self.
- Understanding harmony between the Self and the Body: *Sanyam* and *Swasthya*.
- Correct appraisal of physical needs.
- Meaning of prosperity.
- Programs to ensure *Sanyam* and *Swasthya*.

UNIT III: Understanding Harmony in the Family and Society – Harmony in Human-Human Relationship *(8 Hours)*

- Understanding harmony in the family as the basic unit of human interaction.
- Understanding values in human relationships.
- Meaning of *Nyaya* and programs for its fulfillment to ensure *Ubhay-tripti*.
- Trust (*Vishwas*) and Respect (*Samman*) as foundational values.
- Understanding the meaning of *Vishwas*.
- Difference between intention and competence.
- Understanding the meaning of *Samman*.
- Difference between respect and differentiation.
- Other salient values in relationships.
- Understanding harmony in society as an extension of the family.
- *Samadhan*, *Samridhi*, *Abhay* and *Sah-astitva* as comprehensive human goals.
- Visualizing an undivided society (*Akhand Samaj*) and universal order (*Sarvabhaum Vyawastha*) from family to world family.

UNIT IV: Understanding Harmony in Nature and Existence – Whole Existence as Co-existence *(8 Hours)*

- Understanding harmony in nature.
- Interconnectedness and mutual fulfillment among the four orders of nature.
- Recyclability and self-regulation in nature.
- Understanding existence as co-existence (*Sah-astitva*) of mutually interacting units in all-pervasive space.
- Holistic perception of harmony at all levels of existence.

UNIT V: Implications of Holistic Understanding of Harmony on Professional Ethics *(8 Hours)*

- Natural acceptance of human values.
- Definitiveness of ethical human conduct.
- Basis for humanistic education.
- Humanistic constitution and universal order.
- Competence in professional ethics:
    - Ability to utilize professional competence for augmenting universal human order.
    - Ability to identify the scope and characteristics of people-friendly and eco-friendly production systems, technologies and management models.
- Case studies of holistic technologies, management models and production systems.
- Strategy for transition from the present state to universal human order:
    - At the individual level—as socially and ecologically responsible engineers, technologists and managers.
    - At the societal level—as mutually enriching institutions and organizations.

Course Outcomes (COs) with Bloom's K-Levels Mapping

CO No.	Course Outcome Statements	Bloom's K-Levels
CO1	Explain the need, principles, and process of value education and examine the concepts of happiness, prosperity, and human aspirations.	**K2 – Understand**
CO2	analyse the relationship between the Self and the Body and explain the concepts of harmony, self-regulation, and well-being.	**K4 – Analyse**
CO3	analyse human relationships based on trust, respect, justice, and other universal values for promoting harmony in family and society.	**K4 – Analyse**
CO4	Examine harmony in nature and existence and explain the interdependence of human beings with the natural world.	**K4 – Analyse**
CO5	Apply universal human values and professional ethics to evaluate ethical issues and promote responsible professional practices.	**K5 – Evaluate**

MONETARY AND FISCAL POLICY

BMBF-402 **Course Credit: 3** **Contact Hours: 40**

Course Objectives

1. Provide an overview of key monetary and fiscal policy concepts, frameworks, and techniques.
2. Explain the role of fiscal policy in achieving macroeconomic stability, equity, efficiency, and sustainable economic growth.
3. analyse the major components, instruments, and best practices of monetary and fiscal policies.
4. Develop an understanding of the role of central banking and monetary institutions, particularly in emerging economies.
5. Evaluate the impact of monetary and fiscal policy decisions on economic performance, financial stability, and inclusive growth.

Course Contents

Module I: Monetary Policy and Macroeconomic Environment Management (6 Hours)

Monetary Policy and Macroeconomic Environment Management; Concept and Importance of Monetary Policy; Objectives of Monetary Policy: Price Stability, Employment Generation, Exchange Rate Stability, Balanced Economic Growth and Financial Stability. Conflict among Monetary Policy Objectives: Growth versus Inflation; Role of Monetary Policy in Economic Development; Inflation Management; Monetary Policy Transmission Mechanism; Role of Central Bank in Macroeconomic Management. **Case Studies:** Monetary policy responses during inflationary pressures and economic slowdown.

Module II: RBI's Monetary Policy Committee and Monetary Policy Instruments (10 Hours)

Formation of Monetary Policy Committee (MPC): Purpose, Functions, Constitution and Decision-Making Process; Instruments of Monetary Policy: Concept, Mechanism and Effectiveness of: Bank Rate, Cash Reserve Ratio (CRR), Statutory Liquidity Ratio (SLR), Repo Rate, Reverse Repo Rate, Marginal Standing Facility (MSF) Rate; Review of Monetary Policy Framework of the Reserve Bank of India during the last five years; Recent Monetary Policy Changes announced by RBI. Role of Central Banking in Emerging Economies; Digital Currency and Changing Role of Central Banks. **Case Studies:** RBI monetary policy decisions and their impact on inflation, growth and financial markets.

Module III: Public Finance and Recent Macroeconomic Trends (8 Hours)

Public Finance: Meaning, Scope and Importance; Role of Government in the Economy. Government Intervention: Public Goods, Externalities and Asymmetric Information. Fiscal Policy and Long-Term Economic Growth; Fiscal Policy and Equity; Fiscal Policy and Macroeconomic Stability. Interaction between Monetary Policy and Fiscal Policy; Fiscal-Monetary Coordination. Recent Global and Regional Macroeconomic Trends; Impact of Global Economic Events on Domestic Policy Framework. **Case Studies:** Global financial crises, pandemic response, and economic recovery policies.

Module IV: Fiscal Frameworks, Policies and Economic Impact (10 Hours)

Fiscal Policy: Meaning, Objectives and Components. Government Expenditure in India: Capital Expenditure, Revenue Expenditure, Plan and Non-Plan Expenditure Fiscal Indicators: Fiscal Deficit, Primary Deficit, Revenue Deficit; Impact of Fiscal Deficits on Economic Growth and Stability; Government Receipts: Capital Receipts, Revenue Receipts, Tax Revenue Non-Tax Revenue; Budget Estimates, Revised Estimates and Actual Estimates; Modern Budgeting Practices: Zero-Based Budgeting, Gender Budgeting; Fiscal Devolution and Centre-State Financial Relations; Role of Finance Commission; **Case Studies:** Union Budget analysis and fiscal policy reforms in India.

Module V: Fiscal Policy Sustainability and Inclusive Growth (6 Hours)

Fiscal Sustainability: Concept and Importance; Public Debt Management; Debt Tolerance and Fiscal Space.
Fiscal Sustainability Analysis: Debt Projections, Fiscal Risks, Debt Sustainability Across Countries and Over Time
Fiscal Space: Concept, Optimal and Safe Debt Levels; Relationship between Interest Rates and Public Debt.
Fiscal Policy and Inclusive Growth: Poverty Reduction, Employment Generation, Social Sector Development Sustainable Economic Growth; **Case Studies:** Sustainable fiscal practices and inclusive development strategies.

Activities

a. Analysis of RBI Monetary Policy Committee reports and policy decisions.
b. Presentations on inflation, interest rates, and monetary policy tools.
c. Analysis of Union Budget documents and fiscal indicators.
d. Group discussion on monetary policy challenges in emerging economies.
e. Comparative analysis of fiscal and monetary policies of different countries.
f. Data interpretation exercises using macroeconomic indicators.
g. Assignment on recent economic reforms and policy measures.

Course Outcomes (COs) with Bloom's K-Level Mapping

CO No.	Course Outcome Statements	Bloom's K-Level
CO1	Explain the significance, objectives, and framework of monetary and fiscal policies in emerging economies.	**K2: Understanding**
CO2	analyse the role of central banking and RBI in implementing monetary policy through various instruments.	**K4: Analysing**
CO3	Evaluate fiscal challenges, government expenditure patterns, deficits, and debt sustainability issues.	**K5: Evaluating**
CO4	Apply monetary and fiscal policy concepts and analytical tools to understand their impact on economic performance.	**K3: Applying**
CO5	Formulate fiscal policy strategies using fiscal stance, fiscal multipliers, and debt sustainability frameworks.	**K6: Create**

FOREIGN EXCHANGE AND RISK MANAGEMENT

BMBF-403 **Course Credit: 3** **Contact Hours: 40**

Course Objectives

1. Understand the fundamental concepts of foreign exchange markets, international trade, Balance of Payments (BOP), and exchange rate systems.
2. analyse various theories of exchange rate determination and their implications for international financial decisions.
3. Apply knowledge of foreign exchange transactions, quotations, and trading mechanisms in practical business situations.
4. Evaluate different types of foreign exchange risks and develop appropriate risk management strategies.
5. Develop an understanding of forex operations, international payment systems, and hedging techniques for managing currency risk.

Course Contents

Module I: Foreign Exchange, Foreign Trade and Exchange Rate Systems (8 Hours)

Foreign Exchange and Foreign Trade; Exchange Rate; Foreign Exchange as Stock; Balance of Payments; Balance of Payments Accounting; Components of Balance of Payments; Current Account; Capital Account; Official Reserve Accounts; Debit and Credit Entries; International Exchange Systems; Fixed Exchange Rate System; Floating Exchange Rate System; Exchange Rate System Prior to IMF; Gold Currency Standard; Gold Bullion Standard; Gold Exchange Standard; Exchange Rate System under IMF; Bretton Woods System; Smithsonian Agreement; Flexible Exchange Rate Regime.

Module II: Foreign Exchange Administration and Exchange Rate Theories (8 Hours)

Convertibility of Rupee; Current Account Convertibility; Capital Account Convertibility; Theories of Foreign Exchange Rate Determination; Purchasing Power Parity (PPP); International Fisher Effect (IFE); Interest Rate Parity (IRP); Administration of Foreign Exchange; Authorized Persons; Authorized Dealers; Authorized Money Changers; Foreign Currency Accounts; Nostro Account; Vostro Account; Loro Account; Foreign Exchange Regulations.

Module III: Foreign Exchange Transactions and Market Operations (8 Hours)

Foreign Exchange Transactions; Purchase and Sale Transactions; Exchange Quotations; Direct Quotations; Indirect Quotations; Two-Way Quotations; Spot Transactions; Forward Transactions; Forward Margin; Factors Determining Forward Margin; Merchant Rates; Basis of Merchant Rates; Types of Buying and Selling Rates; Ready Rates Based on

Cross Rates; Forward Exchange Contracts; Fixed Forward Contracts; Option Forward Contracts; Calculation of Fixed and Option Forward Rates; Interbank Deals; Execution of Forward Contracts.

Module IV: Exchange Dealings and Forex Risk Management (8 Hours)

Exchange Dealings; Dealing Position; Exchange Position; Cash Position; Accounting and Reporting; Mirror Account; Value Date; Exchange Profit and Loss; R Returns; Foreign Exchange Markets; Settlement of Transactions; SWIFT; CHIPS; CHAPS; Fedwire; Forex Risk Management; Risks in Forex Dealing; Measurement of Value at Risk (VaR).

Module V: Exchange Exposure and Hedging Strategies (8 Hours)

Exchange Exposure and Exchange Risk; Transaction Exposure; Managing Transaction Exposure; External Hedge; Forward Contract Hedge; Money Market Hedge; Hedging with Futures and Options; Internal Hedge; Translation Exposure; Methods of Translation; Managing Translation Exposure; Economic Exposure; Managing Economic Exposure; Interest Rate Risk; Integrated Foreign Exchange Risk Management.

TREASURY MANAGEMENT IN BANKING

BMBF-404 **Course Credit: 3** **Contact Hours: 40**

Course Objectives

1. Understand the fundamental concepts and principles of treasury management in the banking sector, including its role in financial institutions and its impact on profitability.
2. analyse different money market instruments and fixed income securities used in treasury operations, including their valuation, pricing, and yield curve analysis.
3. Evaluate foreign exchange management techniques employed by banks to manage currency risk through derivatives and hedging strategies.
4. Examine liquidity management and cash management techniques in banking, including cash flow forecasting, working capital management, and liquidity optimization.
5. Assess risk management practices and regulatory compliance requirements in treasury operations, including identification and management of financial risks and Basel III framework compliance.

Course Contents

Module I: Introduction to Treasury Management (8 Hours)

Overview of Treasury Management; Meaning, Concept and Importance of Treasury Management in Banking; Role of Treasury in Financial Institutions; Impact of Treasury Operations on Bank Profitability; Functions and Responsibilities of Treasury Department in Banks; Structure and Organization of Bank Treasury; Front Office, Middle Office and Back Office Functions; Regulatory Framework for Treasury Operations; Risk Management in Treasury Operations.

Module II: Money Markets and Fixed Income Securities (8 Hours)

Concept and Structure of Money Market; Money Market Instruments; Treasury Bills; Commercial Papers; Certificates of Deposit; Call Money Market; Repurchase Agreements (Repo); Fixed Income Securities; Bonds; Government Securities; Corporate Bonds; Features and Classification of Fixed Income Instruments; Yield Curves; Bond Pricing; Valuation of Fixed Income Securities; Yield Measurement and Interest Rate Sensitivity.

Module III: Foreign Exchange Management (8 Hours)

Overview of Foreign Exchange Markets; Participants in Foreign Exchange Markets; Foreign Exchange Operations in Banks; Exchange Rate Mechanism; Foreign Exchange Risk Management; Types of Foreign Exchange Exposure; Hedging Techniques; Currency Derivatives; Forward Contracts; Futures Contracts; Options; Swaps; Managing Exchange Rate Fluctuations in International Trade; Role of Treasury in Forex Management.

Module IV: Liquidity and Cash Management (8 Hours)

Liquidity Management in Banking and Financial Institutions; Importance of Liquidity Management; Cash Flow Forecasting; Working Capital Management; Cash Position Management; Cash Pooling; Cash Concentration; Cash Positioning Strategies; Liquidity Planning and Optimization; Asset Liability Management (ALM); Liquidity Risk Management.

Module V: Risk Management and Compliance in Treasury Operations (8 Hours)

Financial Risks in Treasury Operations; Identification and Measurement of Risks; Interest Rate Risk; Credit Risk; Market Risk; Operational Risk; Risk Measurement Techniques; Value at Risk (VaR); Basel III Framework and its Impact on Treasury Risk Management; Regulatory Compliance; Internal Controls; Treasury Audit; Reporting Requirements; Corporate Governance in Treasury Operations.

INSURANCE AND RISK MANAGEMENT

BMBF-405 **Course Credit: 3** **Contact Hours: 40**

Course Objectives

1. Understand the concepts of risk and uncertainty, classify different types of risks, assess levels of risk, and explain behavioural aspects of risk and economics of insurance.
2. Explain insurable and non-insurable risks and their implications in risk management decisions.
3. Analyze the role of risk management and insurance in economic development and as a tool for social security.
4. Evaluate managerial functions of risk management, risk management processes, and the functioning of insurance organizations.
5. Evaluate insurance contracts as effective tools for risk transfer and risk management.

Course Contents

Module I: Concepts of Risk and Uncertainty (8 Hours)

Risk and Uncertainty Concepts; Meaning and Characteristics of Risk; Causes, Degree and Classification of Risk; Types of Risk; Insurable Risk and Non-Insurable Risk; Cost of Risk; Relationship between Risk and Economic Development; Psychology and Attitude Towards Risk; Behavioural Aspects of Risk; Managing Risk and Uncertainty; Risk Measurement Techniques; Cash Flow at Risk (CFaR); Value at Risk (VaR).

Module II: Risk Management and Managerial Aspects (8 Hours)

Risk Management: Concept, Meaning, Evolution, Purpose, Scope and Importance; Objectives of Risk Management; Role of Risk Management in Economic Growth and Business Sustainability; Risk Management Functions; Role and Responsibilities of Risk Manager; Risk Management Process; Risk Identification; Risk Assessment and Evaluation; Risk Response Strategies; Risk Control and Risk Financing; Risk Management Plan Administration; Risk Management in Global Economy; Future Perspectives of Risk Management.

Module III: Insurance and Risk Management (8 Hours)

Role of Insurance in Managing Risk; Meaning, Nature and Importance of Insurance; Purpose and Functions of Insurance; Classification of Insurance; Life Insurance and General Insurance; Insurance Production Process; Relationship between Insurance and Risk; Insurance and Economic Development; Insurance as a Social Security Tool; Determinants of Insurance Market Structure; Insurance Distribution Channels; Reinsurance: Meaning, Purpose, Importance and Forms of Reinsurance.

Module IV: Insurance Contract and Policy Management (8 Hours)

Insurance Contract: Meaning, Nature and Importance; Subject Matter of Insurance; Principles of Insurance Contract; Essential Features of Insurance Contract as per Contract Act; Special Features of Insurance Contracts; Proposal Form and Documentation; Evidence and Supporting Documents; Payment of Premium; Policy Issuance Process; E-Insurance Policy; Insurance Repositories; Digital Transformation in Insurance Services.

Module V: Regulatory Compliance and Emerging Trends in Insurance Risk Management (8 Hours)

Regulatory Framework of Insurance Industry; Role of Insurance Regulatory and Development Authority of India (IRDAI); Regulatory Compliance Requirements for Insurance Companies; Corporate Governance in Insurance Sector; Risk Management Practices in Insurance Organizations; Emerging Trends and Challenges in Insurance Risk Management; InsurTech and Digital Insurance; Artificial Intelligence in Insurance Risk Assessment; Data Analytics in Insurance; Ethical Considerations and Social Responsibility in Insurance Industry.

Activities

a. Case studies on insurance claims and risk management practices.
b. Risk identification and assessment exercises.
c. Calculation-based exercises on Value at Risk (VaR) and risk measurement.
d. Analysis of insurance products and policy features.
e. Study of IRDAI regulations and insurance reforms.
f. Presentations on emerging trends in InsurTech and digital insurance.
g. Role play on risk management decision-making.
h. Comparative analysis of life and non-life insurance products.

Course Outcomes (COs) with Bloom's K-Level Mapping

CO No.	Course Outcome Statements	Bloom's K-Level
CO1	Explain the concepts of risk, uncertainty, risk classification, and behavioural aspects of risk.	**K2: Understanding**
CO2	Apply concepts of risk identification, evaluation, and response strategies in risk management situations.	**K3: Applying**
CO3	analyse the role of insurance as a risk management tool and its contribution to economic development and social security.	**K4: Analyzing**
CO4	Evaluate insurance contracts, policy structures, and regulatory requirements in insurance operations.	**K5: Evaluating**
CO5	Develop understanding of emerging trends, ethical practices, and strategic approaches in insurance risk management.	**K6: Creating**

RESEARCH PROJECT REPORT AND VIVA VOCE

BMBF-451 **Course Credit: 10**

Introduction and Learning Outcomes

The Research Project Report and Viva Voce is designed to provide students with an opportunity to apply their theoretical knowledge, research skills, and analytical abilities to address a specific problem or topic related to their area of specialization. It may include addresses a specific organizational, industry, or managerial issue through systematic investigation and analysis. The project aims to develop research aptitude, problem-solving skills, and the ability to present findings in a professional manner. After completion of the Research Project Report, students will be able to:

1. Identify and formulate research problems related to business and management areas.
2. Apply appropriate research methodologies for conducting systematic investigations.
3. Collect, analyse, and interpret primary and secondary data using suitable tools and techniques.
4. Develop analytical thinking and provide meaningful conclusions and recommendations based on research findings.

5. Present research outcomes effectively through written reports, presentations and Viva Voce.

Guidelines and Evaluation

1. In the fourth semester, students shall undertake and submit a Research Project Report on a problem/topic assigned by the Management Department under the supervision of a regular faculty member as Faculty Supervisor.
2. The Research Project Report and Viva Voce shall carry a total of 300 marks. The evaluation shall comprise:
   a. Internal Evaluation of the Research Project Report: 100 marks
   b. External Evaluation of the Research Project Report: 100 marks & Viva Voce: 100 marks
3. Internal Evaluation for 100 marks will be conducted by the Faculty Supervisor as per the guidelines given below:
   a. Class Test (CT)-20 Marks: Based on research proposal presentation, problem identification, review of literature, research objectives, and research methodology**.**
   b. Teacher Assessment (TA)- 10 Marks: Based on regularity, attendance, adherence to the project timeline, interaction with the Faculty Supervisor, and overall progress**.**
   c. Practical Sessional (PS)- 70 Marks: Periodic reviews based on the quality and originality of the research work, data collection and analysis, interpretation of findings, report organization, academic writing, referencing, and overall quality of the final Research Project Report**.**
4. External Evaluation for 300 marks will be conducted jointly by an External Examiner appointed by the University and the Faculty Supervisor/ Internal examiner appointed by the Institute. The final marks for the External Evaluation (Research Project Report and Viva Voce) shall be the average of the marks awarded by the two examiners.
5. If the difference between the marks awarded by the Internal and External Examiners in the External Evaluation is 60 marks or more, the external evaluation shall be referred to a Third Examiner appointed by the University. In such cases, the final marks shall be determined by taking the average of the two closest awards out of the three examiners.
6. The Research Project Report shall include the Objectives and Scope of the Study, Significance of the Study, Review of Literature, Research Methodology, Data Analysis and Interpretation, Findings, Conclusions, Recommendations, and Bibliography/References. Relevant tables, charts, figures, and diagrams shall be included wherever appropriate. The report shall be accompanied by a certificate from the Faculty Supervisor and the Head of the MBA Programme certifying the originality and authenticity of the work.
7. Each student shall submit two hard copies of the Research Project Report to the department. The report shall be typed and professionally organised on A4-size paper and shall comprise a minimum of 75 pages, excluding preliminary pages and annexures.
8. The suggestive parameters for evaluation rubrics are given below:
   a. Understanding and relevance of the research topic
   b. Clarity of research objectives and appropriateness of the research methodology
   c. Quality of data collection, analysis, and interpretation
   d. Originality, critical thinking, and practical relevance of the findings
   e. Organization, presentation, and academic writing of the report
   f. Ability to present and defend the research during the Viva Voce
   g. Ability to respond effectively to questions and justify the findings

Course Outcomes (COs) with Bloom's K-Level Mapping

CO No.	Course Outcome Statements	Bloom's K-Level
CO1	Identify and formulate research problems related to business and management disciplines.	**K2: Understanding**
CO2	Apply appropriate research methodology, tools, and techniques for conducting business research.	**K3: Applying**
CO3	analyse and interpret data to derive meaningful research findings and insights.	**K4: Analysing**
CO4	Evaluate research outcomes and develop suitable conclusions and recommendations.	**K5: Evaluating**
CO5	Create and present a comprehensive research report demonstrating professional communication and analytical skills.	**K6: Creating**
