BBFD 501	QUALITY CONTROL IN GARMENTS	2L:1T:0P	3 Credits

Objectives

- To familiarize students about the importance of quality in today's world in general and apparel industry in specific and its relevance to apparel production and merchandising
- To get well versed with the various methods of ensuring the quality of the final product
- To understand and classify various inspection processes
- To understand different care label systems
- To develop an understanding of the importance of eco labels

Learning Outcomes

- Understand the importance of quality in various processes and departments of garment manufacturing units
- Learn the importance and types of quality control
- Become aware of customer perception of quality
- Get well versed with the quality control tools
- Understand the concept and importance of care labels & become aware of eco labels

UNITS	COURSE CONTENTS	LECTURES
UNIT- I	**INTRODUCTION TO QUALITY CONTROL** • Concept of quality & quality control • Importance & type of quality control • Quality Management • Target markets • Product attributes • Quality costs • Consumer satisfaction- customer perception of quality • Quality and consumer safety	9
UNIT- II	**QUALITY CONTROL ORGANIZATIONS, STANDARDS AND REGULATIONS** • Importance of quality testing & analysis • National and International organizations involved in textile testing AATCC, ASTM, ISO, BIS, INDA, GINETEX, etc • Regulations on Apparel Labelling, Eco-labels, silk mark, wool mark, care labels, other international labels • Regulations on Apparel Safety • Need for ISO 9000 and other quality systems, ISO 9000-2000 quality system	9
UNIT – III	**ASSURANCE OF QUALITY IN FABRICS** • Quality control instruments • Compactness of fabric structure • Strength properties- tensile, bursting and tear strength • Colour fastness to washing, dry	9

	cleaning, light, perspiration, crocking and hot pressing • Dimensional stability • Performance properties- resistance to abrasion, pilling, wrinkling, flammability • Quality parameters for fabrics suitable for various end uses-apparel, household textiles, industrial textiles.	
UNIT – IV	**QUALITY CONTROL IN APPAREL** • Quality of design- style, utility and durability • Raw material inspection- fabric (four point system and ten point system), linings, interlinings, sewing threads, zippers, buttons, trims, etc. • In-process inspection- partially finished components of garments • Final inspection- completely finished garments in relation to some standards, specifications or requirements, size measurement, etc.	**9**
UNIT – V	**MANAGING QUALITY** • Tools for managing quality • Evaluating Garment quality • Critical control points • Components of garments	**9**

Suggested Assignments

Assignment 1: Study of a textile manufacturing or processing unit with respect to quality control methods practiced by either a textile or an apparel industry.

OR

Write a report on the market survey of eco-friendly materials, processing techniques and packaging material for different apparel brands (evaluate at least five brands)

Assignment 2: Collect different types of care labels and eco-labels. Prepare a portfolio analysing and interpreting each of the labels collected.

BBFD 502	PRODUCTION TECHNIQUES	2L:1T:0P	3 Credits

Objectives

- To provide a comprehensive overview of the production process of garment manufacturing
- To understand the technique of mass production of ready-to-wear apparel and evaluation of their quality
- To develop the understanding of relationship of cost to quality of readymade garments
- To understand the preparation required for mass production of garments.
- To understand the various assembly line options in garment manufacturing units

Learning Outcomes

- Become aware of the industrial process of mass production of clothing
- Understand the importance of researcher, designer and merchandiser in the production of ready-to-wear garments
- Understand the need of production planning for optimum utilization of resources and be able to appreciate its relationship to cost reduction and increase of profit margin in the apparel production units
- Be able to understand how quality and cost of production are balanced
- Become aware of preparatory steps, production processes and post production operations of the apparel industry

UNITS	COURSE CONTENTS	LECTURES
UNIT- I	**GARMENT INDUSTRY** • Overview of the garment industry • Main sectors of the garment industry	9
UNIT- II	**PRODUCTION PLANNING** • Evaluation of the previous line and trend analysis • Design, sourcing and Costing	9
UNIT – III	**PRE - PRODUCTION** • Fabric testing and approval • Garment specifications • Approval of colour and shades • Care label and other label approval • Grading • Marker making- Marker planning and production, requirements of marker planning, methods of marker making	9
UNIT – IV	**PRODUCTION** • Spreading- requirements of spreading, methods of spreading, nature of fabric packages • Cutting – objectives, methods of cutting, cutting systems • Preparation of cut work for the sewing room- bundling,	9

	ticketing • Fusing- advantages, requirements and methods of fusing • Sewing-stitch types, seam types, types of sewing needles, types of sewing threads	
UNIT – V	**POST PRODUCTION** • Wet processing- garment softening, colour removal, colour addition, wrinkle prevention, etc. • Pressing- purpose of pressing, pressing equipment and method • Garment finishing- adding finishing details, trimming, inspecting, repairing and rework of any defects, pressing, folding and packing	**9**

Suggested Assignments

- Assignment 1: Case study of a garment manufacturing unit.
- Assignment 2: Take any 5 ready-to-wear garments from your wardrobe.

Compare and contrast the following in selected garments-

- fabric and fabric structure
- type of stitches
- embellishment
- price
- label
- garment details

Assignment 3: Prepare a marker plan of a men's shirt for aplain solid colour fabric. Utilize fabric optimally with least fabric wastage.

Assignment 4: Prepare a marker plan of a ladies top for a unidirectional fabric. Utilize fabric optimally with least fabric wastage.

Suggested Visits

- Garment manufacturing units
- Garment trade fairs
- Retail outlets

Guest Lectures

Industrial expert from garment manufacturing units

Educational Tour

- Panipat Ludhiana
- Okhla, Delhi and Noida

BBFD 551	FASHION ILLUSTRATION-III	0L:1T:3P	2 Credits

Objectives

- To develop the ability to work on designs through various stages from preparation of basic designs to a complete look with all the garment details etc.
- To understand the brief and look of the envisaged design
- To learn to communicate design ideas in a format to be understood by the production team
- To understand the 2D and 3D rendering of embellishments like embroidery, beadwork, zardozi, etc.
- To learn to develop flat sketches with correct measurements
- To learn to read, interpret and prepare design sheets for manufacturing
- To learn to create promotional material for the designs
- To display the understanding of the design process through mood board, colourboard, fabric board, range plan sketches and specification drawings for production or industry

Learning Outcomes

- To be able to understand and convey the look of the garment and style features to the production team
- To be able to create the variations / options in overall design
- To be able to provide options in terms of colour combinations and colourways
- To be able to render different fabric features like prints, woven textures and embellishments both 2D and 3D in the sketches
- To be able to highlight the garment details
- To be able to prepare flat sketches of the garments for effective use for product development

COURSE CONTENT

The course includes extensive research in terms of historical development, design evolution, relation between original fabrics, trims and manufacturing processes and contemporary availability of the same. This has to be done for each of the following units. Based on the research a range of garments (a collection) has to be developed. A lot of exploration is expected out of which a range of 7 to 8 garments will be finalized. The collection should include garments for both men and women. The students are required to illustrate their 7-8 garments with proper rendering. For each collection a document has to be produced. Starting from initial doodling to finalization of designs, development of flat sketches along with the embroidery and motif details for the production.

UNIT I - FORMAL WORKWEAR

UNIT II – ACTIVEWEAR

UNIT III - FESTIVE INDIAN WEAR

UNIT IV – DENIMWEAR

UNIT V – CASUALWEAR
UNIT VI - WESTERN
FORMALWEAR

UNIT VII – BRIDALWEAR

Note: The art work and photographs have to be preserved and digitized for compilation towards the development of the Art Portfolio (Semester VIII).

BBFD 552	PATTERNMAKING AND CONSTRUCTION OF KIDSWEAR AND MENSWEAR	0L:1T:3P	3 Credits

Objectives

- To develop different variations in design from basic patterns
- To enable them to make patterns for all kind of designs for kids wear and menswear
- To enable the students to analyse, understand and incorporate design details in upper and lower garments for kids and men
- To enable them to construct and finish the garments
- To enable students to read, calculate, and communicate pattern and production data using standard spec sheet and buyer documentation terminology

Learning Outcomes

- Skills to develop patterns for various designs for kids wear and menswear
- Be able to incorporate different design features
- Be able to understand the most economic layout of pattern pieces on fabric
- Be able to construct and finish these garments
- Be able to calculate ease, tolerance, and fabric consumption, and prepare a spec sheet using standard POM and sample-stage terminology as used in export house documentation

COURSE CONTENT

UNIT-I: KIDSWEAR AND MENSWEAR: MEASUREMENT METHOD, STANDARD BODY MEASUREMENT AND BASIC BLOCKS

- Measurement methods
- Standard body measurements
- Basic blocks for kids: Infants (0-2 years age), Toddlers (2-6 years age), Preteens (6-12 years age, boys and girls both)
- Basic block for men: Front and back bodice, Sleeve, Trouser block

UNIT-II: PATTERN COMMUNICATION AND SPEC LITERACY (applied to Unit-I blocks)

- Points of Measurement (POM), tolerance ranges (woven vs. knit): applied to the bodice, sleeve, and trouser blocks drafted in Unit I
- Ease allowance (wearing, design, negative): calculated on the Unit-I bodice (chest/bust), trouser block (waist/hip), and sleeve/armhole
- SA IN / SA OUT, sloper vs. block, pattern draft vs. production pattern, truing and walking a pattern: demonstrated on the Unit-I basic blocks before students move to design variations

- Notch types and their production meaning
- Fabric consumption vs. fabric requirement: formula, wastage buffer calculation, using the Unit-I block as the base pattern
- Grade rule and cardinal points:
- Tech pack, BOM, costing sheet vs. spec sheet, lead time: as document types

UNIT-III: KIDSWEAR: INFANTS (0-2 year age)

- Pattern development: Romper, Jablas
- Construction of one infant's garment

UNIT-IV: KIDSWEAR: TODDLERS (2-6 year age)

- Pattern development for boys' garments: T-shirt with raglan sleeve, Jeans
- Pattern development for girls' garments: Frocks (frock petal sleeve, frock with shoulder string, pinafore/sleeveless dress with shoulder knot, any one), Skirts (tiered, umbrella any one), Hot pants
- Construction of any one garment either for boys or girls

UNIT-V: KIDSWEAR: PRETEENS (6-12 year age)

- Pattern development for boys' garments: Knee length pants, Short Jacket
- Pattern development for girls' garments: Empire line dress with flare
- Construction of any one garment either for boys or girls

UNIT-VI: MENSWEAR: UPPER GARMENT

- Shirt: formal and casual
- Coat with lapel
- Construction of any one upper garment

UNIT-VII: MENSWEAR: LOWER GARMENT

- Trouser, Jeans
- Construction of any one lower garment

Note: Unit II's spec sheet exercise (POM, tolerance, ease, SA IN/OUT) is first completed on the Unit-I basic blocks as a graded Unit II submission. From Unit III onward, every garment submitted must carry its own one-page spec sheet using the same terminology, applied now to the specific design variation rather than the base block.

Suggested Assignments

- Prepare a catalogue of swatches of various types of fabrics suitable for kids and menswear
- Market survey of kids wear and menswear stores to study styles in vogue with details of features in fabric
- Prepare a spec sheet with POM table, tolerance, and ease calculation for the Unit-I basic bodice, sleeve, and trouser block
- Prepare a spec sheet with POM table, tolerance, ease calculation, and SA IN/OUT for one completed garment from Units III-VII
- Calculate fabric consumption and marker efficiency for one submitted garment and compare against RFFD-557 CAD-generated figures

BBFD 553	DESIGN AND DEVELOPMENT OF KIDSWEAR	0L:1T:3P	2 Credits

Objectives

- To familiarize with the growing kids, wear market, with special reference to local, national & international brands
- To understand different categories of kids wear
- To conduct a market survey viz a viz contemporary design in terms of style details, colours, fabrics, trims, sizes and price
- To understand the usage of appropriate textile materials for the development of kids wear
- To understand design details and special features for kids of different age groups
- To acquire construction and finishing techniques for kids wear

Learning Outcomes

- Be able to understand the socio-economic-cultural factors that contribute to the expansion of the kids wear market
- Be able to co-relate textile properties like fabric construction, texture and design with garment design
- Be able to design and adapt according to market requirements and latest trends Be able to draft patterns
- and incorporate appropriate construction and finishing techniques

COURSE CONTENT

AIM: To create a range of garments after thoroughly understanding the market and the needs of customers. It should be a mini collection of four or five complete outfits based upon a theme developed and researched by the group. The outfits should be well supported by suitable accessories.

BRIEF: The objective is to explore and develop a range of kids wear based on the following:

- Research on trends in the past and present scenario, textile materials, embellishments, construction and finishing details etc.
- Selection of a theme which inspires or excites
- Preparation of a story board
- Initial design explorations Final Illustrations
- Formulation of specification sheet
- Development of paper patterns
- Development of toiles in

muslin

- Sourcing of materials required (fabrics, trimmings and accessories) Construction and finishing of garments
- Accessorizing the collection
- Presentation of the group collection to a jury

METHODOLOGY

- The class will be divided into groups of four or five students. They will interact and support each other in the investigative research in the market, library and the forecast. At the end a common theme should emerge.
- The group will next create a colour palette and story board based on the theme that should comprise of visual references and a fabric story.
- Each individual student develops a number of design sketches for garments around the theme
- Individual design sketches and ideas must be developed ensuring that silhouettes and design details are suitable for kids wear. Also ensure that while designing separates, equal attention is given to tops and bottoms. Also designing for both boys and girls must be attempted.
- The range must consist of a number of garments which can be put together to form a mini collection of four to five outfits.
- All garments must be illustrated as accurate working/specification sheets.
- A complete labelled paper pattern for the same needs to be developed with all instructions and symbols etc. mentioned
- The toiles for each group member's final garment should also be developed
- Each student in a group is expected to make one final finished garment.
- The group will also create a brand name and a logo for their group's collection. They will also design an individual font for their designer label.
- During the final presentation to the jury the complete outfit (prepared by all the group members) should be displayed along with the suitable accessories.

Suggested categories

- Formalwear
- Party wear
- Playwear
- Holiday / resort wear
- Sleepwear
- School wear
- Outerwear

Note: The art work and photographs have to be preserved and digitized for compilation towards the development of the Art Portfolio (Semester VIII).

BBFD 554	DESIGN AND DEVELOPMENT OF MENSWEAR	0L:1T:3P	2 Credits

Objectives

- To familiarize with the growing menswear market, with special reference to local, national & international brands
- To understand different categories of menswear
- To conduct a market survey viz a viz contemporary design in terms of style details, colours, fabrics, trims, sizes and price
- To understand the usage of appropriate textile materials for the development of menswear
- To acquire construction and finishing techniques for menswear
- To develop the skill for creating a menswear collection

Learning Outcomes

- Be able to understand the socio-economic-cultural factors that contribute to the expansion of the menswear market
- Be able to co-relate textile properties like fabric construction, texture and design with garment design
- Be able to design and adapt according to market requirements and latest trends
- Be able to draft patterns and incorporate appropriate construction and finishing techniques

COURSE CONTENT

AIM: To create a range of garments after thoroughly understanding the market and the needs of customers. It should be a mini collection of four or five complete outfits based upon a theme developed and researched by the group.

BRIEF: The objective is to explore and develop a range of menswear based on the following:

- Research on trends in the past and present scenario, textile materials, embellishments, construction and finishing details etc.
- Selection of a theme which inspires or excites Preparation of a story board
- Initial design explorations Final Illustrations
- Formulation of specification sheet
- Development of paper
- patterns Development of toiles in muslin
- Sourcing of materials required (fabrics, trimmings and accessories) Construction and finishing of garments
- Accessorizing the collection
- Presentation of the group collection to a jury

METHODOLOGY

- The class will be divided into groups of four or five students. They will interact and support each other in the investigative research in the market, library and the forecast. At the end a common theme should emerge.

The group will next create a colour palette and story board based on the theme that should comprise of visual references and a fabric story.

- Each individual student develops a number of design sketches for garments around the theme
- Individual design sketches and ideas must be developed ensuring that silhouettes and design details are suitable for menswear. Also ensure that while designing separates, equal attention is given to tops and bottoms.
- The range must consist of a number of garments which can be put together to form a mini collection of four to five outfits.
- All garments must be illustrated as accurate working/specification sheets.
- A complete labelled paper pattern for the same needs to be developed with all instructions and symbols etc. mentioned
- The toiles for each group member's final garment should also be developed
- Each student in a group is expected to make one final finished garment.
- The group will also create a brand name and a logo for their group's collection. They will also design an individual font for their designer label.
- During the final presentation to the jury the complete outfit (prepared by all the group members) should be displayed along with the suitable accessories.

Suggested categories

- Formalwear
- Outerwear
- Leisurewear
- Active wear/ Sportswear
- Holiday / resort wear
- Party wear
- Sleepwear

Note: The art work and photographs have to be preserved and digitized for compilation towards the development of the Art Portfolio (Semester VIII).

BBFD 555	ADVANCED DRAPING	0L:1T:3P	3 Credits

Objectives

- To improve the skill of draping for dress designing
- To enable students to handle various types of fabrics
- To be able to develop their own designs into a draped garment
- To enable students to develop garments with good fit

Learning Outcomes

- Be able to convert flat fabric into a garment with proper fit
- Be able to appreciate the importance of the grain of the fabric in relation to design
- Be able to translate a design into a finished garment
- Be able to express design ideas through draping and dress designing

COURSE CONTENT

UNIT - I VARIATIONS OF BASIC BODICE

- Halter
- Wrap front bodice
- Waistline variations- lowered or raised Boned
- bodice
- Cowls

UNIT - II VARIATIONS OF SKIRT

- Dirndle skirt
- Dome skirt
- Gored skirt
- Peg skirt
- sarong skirt
- Skirt with built up waistline
- Fitted midriff
- Bodice yoke

UNIT– III SHIFT

- Straight shift
- Sheath
- A-line shift
- Blouse Princess dress

UNIT - IV SLEEVE

- Basic dolman sleeve
- Raglan sleeve
- Kimono sleeve

UNIT – V PANTS

- Basic straight trouser
- Jeans

Suggested Assignments

- Select a theme and design a garment based on the same. Construct designed garment using draping technique.
- Select any one garment (such as circular skirt, cowl neck top, etc.). Drape fabrics of different material (poplin, denim, chiffon, satin, etc.) and thickness on the chosen garment and make visual comparison of difference in the draping style.

Suggested Visits

- Sampling section of garment manufacturing unit
- Studio of a local designer

Guest Lectures

- Fashion designer
- Industry expert from garment manufacturing units

BBFD 556	FABRIC ORNAMENTATION - II	0L:1T:3P	2 Credits

Objectives

- To enhance the skills of surface adornment on textile material
- To understand the nuances of visualization and ideation process
- To get introduced to various techniques of fabric deconstruction, layering, combining and texturing for surface regeneration
- To develop the ability to interpret, articulate and represent emotive qualities in surfaces through application of different techniques and material

Learning Outcomes

- Become aware of and understand various techniques of fabric deconstruction and reconstruction for surface development
- Be able to develop skills to enhance the aesthetic value of any fabric through ornamentation
- Enhance the creative skills in developing new concepts through visualization and ideation to replicate an inspiration
- Understand the scope for design intervention and innovation in using these techniques for creative and contemporary product development

COURSE CONTENT

BRIEF: The objective is to explore and develop a range of textile surfaces based on the following:

- Research on general history of different techniques and materials, traditional application, contemporary trends in surface development and a sense of future perspective
- Selection of a theme to derive interesting surfaces Articulation of
- keywords and techniques Exploration of different material

METHODOLOGY: Major part of learning in this course would be through assignments, explorations and innovations with different material. The students will follow a stepwise process to develop their concepts.

- Each student will work individually on every project
- Based on the latest forecast, each student will identify one trend / theme and list out the related keywords for the same
- Based on the keywords, every student will source four visuals related to the theme
- Using one visual each as inspiration for every project, the student will source appropriate material to work on their surface development concepts
- Using different material, the students will create their surfaces to identify with the selected visual
- The students will document all explorations and stages of work
- Identify appropriate end use in apparel for each developed final concept (four final concepts) and present through appropriate illustrations

UNIT-I LAYERING OF FABRICS

Project – 1 Students are required to explore the various techniques of layering using different types

of fabrics in at least **ten** different ways. The developed swatches should be properly mounted, labelled and presented in the form of a portfolio.

UNIT II- DECONSTRUCTION

Project – 2

Students are required to explore the various techniques of deconstruction of fabrics (pulling out yarns, cutting in places, developing empty areas etc.) in at least **ten** different ways. The developed swatches should be properly mounted, labelled and presented in the form of a portfolio.

UNIT III - COMBINING / JOINING FABRICS

Project – 3

Students are required to explore the various techniques of combining or joining surfaces using different types of fabrics in at least **ten** different ways. The developed swatches should be properly mounted, labelled and presented in the form of aportfolio.

UNIT IV - TEXTURED SURFACES

Project – 4

Students are required to develop at least **ten** different textures on various types of fabrics using different techniques (puckering, pleating, stitching, couching, quilting, 3D textures etc.). The developed swatches should be properly mounted, labelled and presented in the form of a portfolio.

UNIT V - FINAL PROJECT

Using a combination of any two or more of the above explored techniques, the student is required to design and develop one fashion accessory product for a hypothetical client, keeping in mind the consumer dynamics, price and other related factors. The design process should be completely followed and properly documented and submitted in the form of a project report along with the developed product at the end of the project.

NOTE:

1. All projects are to be done by individual students. The students will have to prepare a portfolio of all work done during each project and submit for evaluation and the complete portfolio should be submitted at the end of the course for final evaluation.
2. The art work and photographs have to be preserved and digitized for compilation towards the development of the Art Portfolio (Semester VIII).

Suggested Visits

- Craft exhibitions
- Craft bazaars Design
- studios
- Local export houses

Guest Lectures

- Fashion designer

- Industry expert from garment manufacturing units Craftsmen

Reference Material

- Claire B. Shaeffer, Couture Sewing Techniques, The Tounton Press, 2007

BBFD 557	CAD PROJECT (TUKATECH)	0L:1T:3P	2 Credits

Objectives

- To develop proficiency in pattern-making software with advanced functionality and process engineering for accurate pattern building
- To enable students to create bespoke grade rules and apply automatic grading across multiple sizes
- To develop skill in marker nesting and layout optimization for every style conceived
- To familiarize students with tailor editing and made-to-measure workflows using scanned or keyed-in customer measurements
- To develop competence in generating industrial reports for costing, yield, and production planning
- To introduce digital sampling and virtual fit review as a substitute for physical sample rounds ahead of buyer approval, delivered through a cost-viable mix of institutional and free-trial resources

Learning Outcomes

- Be able to build and grade patterns digitally using standard measurement charts and cutter & specifications
- Be able to create efficient markers, including stripe/plaid matching and CNC-ready cut paths
- Be able to apply tailor editing functions to fit a pattern to individual customer measurements
- Be able to generate industrial-standard reports for weight, yield, cost, and time from marker files
- Be able to import a graded 2D pattern into a 3D visualizer, apply virtual fabric properties, and review fit on a virtual model, on whichever available platform (TUKA3D, Marvelous Designer, or CLO3D)
- Be able to compare virtual sample turnaround against physical sample turnaround as a cost and time decision

COURSE CONTENT

Unit-1: PATTERN MAKING AND GRADING

- Measurement chart, pattern card and cutter's must
- Before and after wash shrinkage
- Integration of art work and logos
- Yield reports with costing
- Adobe PDF plot format
- Multiple sizes grading with automatic half size creation
- Angle grading for curved contours
- Block libraries with master grading
- Automatic grading update with pattern changes

Unit-2: MARKER MAKING

- Manual or automatic marker making
- Stripe and plaid matching (with image view)
- Merge pattern pieces and marker for efficient result
- Dynamic blocking and measuring functions
- Call up additional pieces or complete sizes

- Create and edit cut path for CNC cutters
- Edit or alter patterns while making markers
- Add buffers during marking at selected segments of patterns for quality cutting

Unit-3: TAILOR EDITING

- Import or key in body scanned measurements
- Find closest size from standard size ranges
- Automatically see differences between the customer and chosen size measurements
- Generate XML file for trial done by customer
- Maintaining history of a particular customer's pattern file
- Create template for various fits allowances

Unit-4: INDUSTRIAL EDITION

- Create single Excel report for multiple markers
- Generate weight and yield report
- Send marker files to plotters and cutters
- Generate PDF file of markers
- Generate Excel report for weight, cost and time calculations

Unit-5: DIGITAL SAMPLING AND VIRTUAL FIT

- Concept and theory: role of digital sampling in reducing physical sample rounds, taught via
- TAPE & free online video modules and TUKA3D's own tutorial channel, no license required for this portion
- Importing a graded 2D pattern into a 3D visualizer: demonstrated on one institutional
- TUKA3D single-seat license or trial license, faculty-led, batch rotation for hands-on time
- Assigning virtual fabric properties (drape, weight, stretch, texture mapping): practiced individually on a free trial license of an alternative 3D garment simulation tool (Marvelous
- Designer 30-day free trial, or CLO3D trial), scheduled so each student's practice window falls inside the trial period
- Digital stitching and seam assignment on a virtual avatar: practiced on the same trial tool as above, concept is transferable across TUKA3D, Marvelous Designer, and CLO3D since all three use the same 2D-pattern-to-3D-avatar principle
- Reviewing virtual fit on a standard fit model: identifying pull lines, excess ease, drag, and grain distortion
- Recording fit comments directly on the virtual sample in place of a physical fit sample round
- Exporting a virtual fit report and turntable/still images for buyer or merchandiser review, submitted as the graded deliverable regardless of which software produced it
- One-day exposure visit to a local export house or CAD bureau already running a licensed
- TUKA3D setup, in place of individual student licensing, tied to the existing Suggested Visits category

BBFD 558	INTEGRATED DESIGN PROJECT-III	0L:1T:3P	2 Credits

Learning Outcome

- Be able to plan and produce a menswear and kids wear collection that demonstrates expertise in all methods of construction and knowledge of technical data for structural components, stitch methods, pressing, finishing and presentation
- Be able to evaluate, analyze and summarize the collection through appropriate styling and accessories.
- Develop an ability to produce a two-dimensional portfolio of work that projects the collection theme and exhibits the evolution of the theme and finalization of the product design and developing of kids wear and menswear

Context of the Project

The integrated design project should incorporate and integrate the understanding of basic design, elements of design, design process, fashion illustration, pattern making, garments construction, draping and surface ornamentation thereby creating a meaningful correlation and application within the context of fashion. This is done by attempting to evolve an aspired image and then creating a garment, which represents the image for a target customer.

The project will concentrate on encouraging a mature and self-motivated approach towards the final product and completion of work on a creative, original and technically sound either a kids wear or menswear.

Having gained proficiency in earlier skills, the students have also been given more advanced and specific inputs on:

I. Design Philosophy

- Concept Development
- Design and development of kids wear and menswear Fashion illustration
- Computer Aided Designing

II. Skills Acquired

- Fashion illustration
- Advanced draping Fabric ornamentation

III. Knowledge Gained

- Quality control in garments
- Production techniques

IV. Product Development

- Pattern making of kids wear and menswear

Project Methodology

Based on all the above inputs received during all the five semesters, two students are required to work together to conceptualize and develop a mini collection of three kidswear or menswear outfits each (two for kids and one for men or one for kids and two for men). An element of fabric ornamentation to be suitably introduced. The collection should be based on the criteria of:

- Season
- Categories
- Target market
- Customer profile / psychographics (age group, income, attitude etc.)

The students are also required to accessorize the collection to achieve a complete look.

Note: The art work and photographs have to be preserved and digitized for compilation towards the development of the Art Portfolio (Semester VIII).

BBFD 601	KNITTING TECHNOLOGY	2L:1T:0P	3 Credits

Objectives:

- To create awareness about the knitting innovations leading to new garment concepts
- To understand the new knitting machinery and mechanisms
- To understand characteristics of garment from design, handling problems and seam characteristics to quality control
- To understand the reasons leading to modification to frames and diversification of product

Learning Outcomes:

- Become aware of history and development of knitted garments
- Become aware of types of knitted garments in relation to cutting and production techniques
- Understand the advancement in knitting concepts
- Be able to understand the various finishing techniques for knitted garments
- Be aware of various quality parameters of knitted garments

COURSE CONTENT

UNITS	COURSE CONTENTS	LECTURES
UNIT- I	**INTRODUCTIONTO KNITTING** • History • Warp and weft knitted fabrics • Types of knitted garments : Fully cut, Stitch shaped cut, Fully Fashioned, Integral	**7**
UNIT- II	**PRODUCTION, SPREADING AND CUTTING OF KNITTED GARMENTS** • Fashioned Integral garments	**7**
UNIT – III	**STITCH GEOMETRY, SEAMS AND SEAMING** In terms of: • Single chain stitch, • Double chain stitch, • Over-chain stitch, • Fully-Cut, • Multi-thread chain stitch, • Lockstitch	**10**
UNIT – IV	**MACHINERY FOR DEAMING KNITTED GARMENTS** • Supporting and advancing the work • Stitch formation • Type of machinery Ergonomic, considerations	**7**
UNIT – V	**HANDLING CONCEPTS** • Traditional production systems • Conveyor systems • Humanization of work • Automation	**7**
UNIT – VI	**QUALITY CONTROL OF KNITTED GARMENTS**	**7**

	In terms of: • Fabric quality Knitted • faults Stains and pilling • Garment quality • Assessment-Yarn and fabric	

Suggested Assignments

- Make a group presentation (at least three students in a group) on any one knitting machine and give details about its working, stitch formation etc.
- Make a group presentation (at least three students in a group) on any one parameter of quality control of knitted garments

Suggested Visits

- Knitwear manufacturing unit
- Textile testing laboratory
- Trade fair

Guest Lectures

- Fashion designer
- Industry expert from knitwear manufacturing units

Educational Tour

- Ludhiana Manipur

Textbooks

- Brackenbury, Terry, Knitted clothing technology, Blackwell publishing, 1992

BBFD 602	FASHION MERCHANDISING AND MANAGEMENT	2L:1T:0P	3 Credits

Objectives

- To develop an understanding of fashion merchandising and role of merchandisers in the fashion industry
- To learn technical skills, sharpen creativity and develop business understanding for working in the fashion industry
- To understand the importance of visual merchandising in retail and the visual merchandising process
- To understand various merchandising systems
- To get introduced to the various methods of fashion promotion

Learning Outcomes

- Be able to acquire a thorough background in the business aspects of the fashion industry
- Understand fashion merchandising, its scope and the role of merchandisers in the fashion industry
- Understand visual merchandising as a tool for effective retailing
- Be able to develop competencies in fashion theory and marketing of fashion goods Understand the basics of fashion promotion

UNITS	COURSE CONTENTS	LECTURES
UNIT- I	**INTRODUCTION TO MERCHANDISING** • Definition of merchandising • Understanding fashion merchandising • Scope of merchandising • Types of merchandisers • Characteristics of a merchandiser • Role of a merchandiser	9
UNIT- II	**VISUAL MERCHANDISING** • History of visual merchandising • Principles for visual merchandising • Techniques of visual merchandising • Colour & Texture in visual merchandising	9
UNIT – III	**MERCHANDISING SYSTEMS** • Business to business relationships –wholesaling • Business to consumer transactions – retailing • Types of retailing / retail stores	9
UNIT – IV	**FASHION MERCHANDISE MANAGEMENT** • Forecasting sales • Developing a line concept- creative and technical design • Merchandise management process- organizing and managing the line • Developing an Assortment plan • Buying Preparations – Merchandise Plan, Buying Plan	9
UNIT – V	**FASHION PROMOTION** • Marketing – Theories and Principles • Planning and Direction, Fashion Advertising • Kinds of Advertising Publicity Special Events – Fashion Shows, Trade Shows	9

Suggested Assignments

- Conduct a classroom quiz on basics of fashion merchandising
- Conduct a detailed comparative study between a branded and local retail store studying their background, product line, location, customer profile, sales, marketing and promotion etc.
- Visit any local market and compare and analyse the visual merchandising outside and inside the stores of three different brands of any one particular product
- Make a 3-D model of a store for a specific product, depicting a visual merchandising environment for the same.

Suggested Visits

- Any local buying house or buying agency Any trade
- show or trade fair in near vicinity

Guest Lectures

- Merchandiser from export or buying house

Textbooks

- Gini Stephens Fringes, Fashion from Concept to Consumer, Prentice Hall Grace Kunz,
- Merchandising Third Edition – Theory, Principles and Practice, Fairchild Books
- Tate S.L, Inside Fashion Design, Harper and row Publishers, New York, 3rd Ed.

BBFD 651	PATTERN GRADING	0L:1T:3P	2 Credits

Objectives

- To develop a comprehensive understanding of pattern grading and its principles.
- To sensitize students to the need and importance of grading in garment production.
- To enhance knowledge of different grading methods and techniques.
- To develop practical skills in grading flat patterns accurately.
- To acquire knowledge of computer-aided grading software used in the apparel industry.
- To familiarize students with the effective use of pattern making, grading, and marker planning software.
- To understand the role of grading in achieving accurate garment fit across different size ranges.

Learning Outcomes

Upon successful completion of the course, students will be able to:

- Apply different methods and techniques of pattern grading.
- Grade flat patterns accurately for various garment styles.
- Understand and apply domestic and international sizing systems in garment grading.
- Maintain design proportions and garment fit while grading patterns.
- Perform manual and computer-aided grading for a variety of apparel products.
- Use computer software for pattern making, grading, and marker planning effectively.
- Demonstrate technical proficiency in CAD-based grading and marker making for efficient garment production.
- Integrate grading techniques with industry standards for apparel manufacturing.

COURSE CONTENT

UNIT–I: Introduction to Grading

- Introduction to pattern grading
- Concept and importance of grading
- Grading terminology
- Standard sizes and body measurements
- Methods of grading:
  - Stack method
  - Track method
- Types of grading:
  - Horizontal grading
  - Vertical grading
  - Diagonal grading

UNIT–II: Grading of Master Blocks

- Grading of basic bodice
- Grading of front bodice
- Grading of back bodice
- Grading of basic sleeve
- Grading of basic collar
- Grading of torso block

UNIT–III: Grading of Adult Sleeve Blocks

- Set-in sleeve
- Set-in sleeve with elbow dart
- Set-in sleeve with cuff dart
- Kimono sleeve
- Raglan sleeve

UNIT–IV: Grading of Collars and Lapels

- Tailored collar
- Tailored lapel
- Shawl collar

UNIT–V: Grading of Skirts and Trousers

- Straight skirt
- Front and back skirt grading
- Flared trousers

UNIT–VI: Application to Styled Garments

- Grading of paneled jacket
- Grading of shirt

UNIT–VII: Developing Gradients

- Development of grading increments (gradients)
- Creating small and medium sizes from available extra-small and large-size patterns
- Developing graded patterns for:
  - Basic bodice
  - Basic sleeve
  - Basic skirt

UNIT–VIII: Computer-Aided Pattern Development

- Pattern development using CAD
- Computerized pattern grading
- Marker making and marker planning
- Fabric utilization and marker efficiency
- Introduction to CAD software for pattern making, grading, and marker planning

Suggested Assignments

- Execute grading of front and back for a basic knee length dress
- Develop pattern of small and medium size with the available extra small and large size pattern of the following

- Basic collar
- Set-in sleeve (any one) Grown on sleeve (any one)

- Develop gradient of double breasted jacket
- Make a visit to an export house to observe grading and submit an illustrated report.

Suggested Visits

- Export house

Guest Lectures

- Industry CAD expert from garment manufacturing units

Textbooks

BBFD 652	PATTERNMAKING AND CONSTRUCTION OF INDIANWEAR	0L:1T:3P	3 Credits

Objectives

- To develop pattern-making skills for different garment variations from the basic pattern.
- To enable students to draft patterns for a wide range of Indian wear designs.
- To develop the ability to analyze, understand, and incorporate design details in men's and women's upper and lower garments.
- To equip students with the skills required to construct and professionally finish Indian wear garments.

Learning Outcomes

Upon successful completion of the course, students will be able to:

- Develop patterns for various styles of Indian wear garments.
- Incorporate different design features and style variations into basic patterns.
- Plan efficient pattern layouts on fabric to minimize material consumption during garment construction.
- Construct and professionally finish Indian wear garments for both men and women.
- Apply pattern-making and garment construction techniques to create well-fitted traditional Indian apparel.
- Demonstrate proficiency in selecting appropriate construction methods for different Indian garment styles.

COURSE CONTENT

UNIT -I Traditional Fabrics for Indian Wear

- **Embroidered Fabrics:** Hand embroidery & Machine embroidery
- **Painted Fabrics:** Kalamkari, Pichhwai, Madhubani
- **Printed Fabrics:** Block print, Screen print, Warak print, Tinsel print, Ajrakh, Rogan
- **Woven Fabrics:** Brocade, Jamdani, Baluchari, Tangail, Kota Doria, Chanderi, Maheshwari, Muga Silk, Muslin
- **Resist-Dyed Fabrics:** Tie-Dye, Ikat, Telia Rumal

UNIT – II Women's Indian Wear – Upper Garments

Blouses

- Four-dart blouse
- Choli-cut blouse
- Katori blouse
- Princess-line blouse
- Long blouse
- Lined blouse

- Blouse with collar
- Blouses with yokes: **Midriff yoke**

  (Any four styles to be practiced)

Kurta / Kameez

- Fitted kurta with darts
- Princess-line kurta
- Sheath (straight) kurta with darts
- Semi-fitted kurta: Straight with slit, A-line, Neckline and style-line variations
- Construction of any one women's upper garment using a traditional Indian fabric (refer Unit–I).

UNIT–III: Women's Indian Wear – Lower Garments

Petticoats: 8-panel petticoat, 6-panel petticoat, Petticoat with hip yoke, Bias-cut petticoat

Salwars : Salwar with belt, Salwar, Full Patiala salwar, Churidar with belt

Long Skirts: Panelled, Flared, Gathered, Circular, Wrap-around

- Construction of any one women's lower garment using a traditional Indian fabric (refer Unit–I).

UNIT–IV: Men's Indian Wear – Upper Garments

Kurta, Bandi (Nehru Jacket), Achkan, Angrakha

Jackets : Waistcoat (Jawahar cut)

- Construction of any one men's upper garment using a traditional Indian fabric (refer Unit–I).

UNIT–V: Men's Indian Wear – Lower Garments

- Pyjama
- Straight Churidar
- Aligarh Pyjama
- Construction of any one men's lower garment using a traditional Indian fabric (refer Unit–I).

Suggested Assignments

The whole class can be divided into groups of four to five students. Each student will sketch and collect pictures of various types of silhouettes and design styles of Indian wear.

Analyse fabrics, design details and embellishments of the collected pictures. Also trace out the deviation through paper pattern in their styles from the basic skirt block.

Suggested Visits Craft Museum National museum

- Dastkar craft bazaar State
- Emporiums Indian Designer's
- studio
- Local tailoring shops and boutiques

BBFD 653	DESIGN & DEVELOPMENT OF INDIANWEAR	0L:1T:3P	2 Credits

Objectives

- To familiarize students with the growing Indian wear market, with special reference to local and international brands.
- To develop an understanding of the different categories of Indian wear.
- To understand the methodology of conducting market surveys and analyzing contemporary designs in terms of style details, colours, fabrics, trims, sizes, and pricing.
- To understand the selection and application of appropriate textile materials for Indian wear.
- To develop knowledge and skills in pattern development for Indian wear garments.
- To acquire garment construction and finishing techniques for Indian wear.

Learning Outcomes

Upon successful completion of the course, students will be able to:

- Understand the socio-economic and cultural factors contributing to the growth of the Indian wear market.
- Analyze the evolution of Indian wear from traditional to contemporary styles.
- Correlate textile properties such as fabric construction, texture, and surface design with garment design and functionality.
- Design and adapt Indian wear garments according to market requirements and current fashion trends.
- Draft accurate patterns for a variety of Indian wear garments.
- Apply appropriate garment construction and finishing techniques to produce professionally finished Indian wear.
- Evaluate contemporary Indian wear in terms of aesthetics, functionality, and commercial viability.

COURSE CONTENT

AIM

To create a range of garments after thoroughly understanding the market and the needs of customers. It should be a mini collection of four or five complete outfits based upon a theme developed and researched by the group.

BRIEF

The objective is to explore and develop a range of Indian wear based on the following:

- Research on trends in the past and present scenario, textile materials, embellishments, construction and finishing details etc.

- Selection of a theme which inspires or excites
  Preparation of a story board
- Initial design explorations Final
  Illustrations
- Formulation of specification sheet
  Development of paper patterns
  Development of toiles in muslin
- Sourcing of materials required (fabrics, trimmings and accessories) Construction and finishing of garments
- Accessorizing the collection
- Presentation of the group collection to a jury

METHODOLOGY

- The class will be divided into groups of four or five students. They will interact and support each other in the investigative research in the market, library and the forecast. At the end a common theme should emerge.

The group will next create a colour palette and story board based on the theme that should comprise of visual references and a fabric story.

- Each individual student develops a number of design sketches for garments around the theme
- Individual design sketches and ideas must be developed ensuring that silhouettes and design details are suitable for Indian wear. Also ensure that while designing separates, equal attention is given to tops and bottoms. Also designing for both men and women must be attempted.
- The range must consist of a number of garments which can be put together to form a mini collection of four to five outfits.
- All garments must be illustrated as accurate working/specification sheets.
- A complete labelled paper pattern for the same needs to be developed with all instructions and symbols etc. mentioned
- The toiles for each group member's final garment should also be developed Each student in a group is expected to make one final finished garment.
- The group will also create a brand name and a logo for their group's collection. They will also design an individual font for their designer label.
- During the final presentation to the jury the complete outfit (prepared by all the group members) should be displayed along with the suitable accessories.

Note: The art work and photographs have to be preserved and digitized for compilation towards the development of the Art Portfolio (Semester VIII).

BBFD 654	LEATHER SOURCING & DEVELOPMENT OF LEATHER PRODUCTS	0L:1T:3P	2 Credits

Objectives

- To understand the different aspects of fashion leather and non-leather materials.
- To develop skills and techniques for handling leather and alternative materials.
- To study current market trends in leather and non-leather fashion products.
- To interpret market trends and develop original design concepts.
- To enhance creativity in designing fashion accessories and products using leather and non-leather materials.

Learning Outcomes

Upon successful completion of the course, students will be able to:

- Develop design skills for leather and non-leather fashion products.
- Apply appropriate techniques for handling and constructing leather and alternative materials.
- Create innovative designs using a variety of leather and non-leather materials.
- Design fashion products according to specific themes, consumer needs, and market trends.
- Demonstrate creativity and technical proficiency in the development of leather and non-leather fashion products.
- Produce functional, aesthetically appealing, and market-oriented leather and non-leather products.

COURSE CONTENT

UNIT–I: Types of Leather

- Introduction to leather and skin
- Types of leather and skins
- Properties and characteristics of leather
- Leather produced in different countries and their specialties
- Classification and applications of various types of leather

UNIT–II: Basic Tanning Process

- Introduction to leather tanning
- Chemical composition of leather
- Stages of the tanning process
- Leather colouring and dyeing techniques
- Leather finishing processes and surface treatments
- Quality assessment of finished leather

UNIT–III: Leather Handling and Utilization Techniques

- Introduction to leather handling techniques
- Identification and use of basic leatherworking tools

- Safe handling and maintenance of leather tools and equipment
- Basic cutting, marking, stitching, and finishing techniques
- Material utilization and waste minimization

UNIT–IV: Study of Bags, Belts, and Household Products

- Introduction to leather bags, belts, and household products
- Design principles for leather accessories
- Product research and market analysis
- Material selection for leather products
- Experimentation with different leather and non-leather materials
- Prototype development of accessories

UNIT–V: Study of Shoes and Apparel

- Introduction to leather footwear and apparel
- Design concepts and product development
- Research on contemporary fashion trends
- Material experimentation for shoes and garments
- Development of innovative leather and non-leather products

UNIT–VI: Report Preparation

- Preparation of market survey reports
- Study of leather markets and consumer preferences
- Industrial visit to tanneries
- Visit to leather product manufacturing industries
- Documentation of observations and findings
- Report writing and presentation of survey and industry visit outcomes

Suggested Assignments

PROJECT-1

- Use different leather materials and develop different designs

PROJECT-2

- Theme based leather products development

Suggested Visits

- Leather product Export houses/buckle factory/market visit

Note: The art work and photographs have to be preserved and digitized for compilationtowards the development of the Art Portfolio (Semester VIII).

BBFD 655	ADVANCED PHOTOGRAPHY & STYLING	0L:1T:3P	2 Credits

Objectives:

- To develop an understanding of personal styling, clientele aspirations, social engagement and its application in different professional environments
- To understand the interrelation of, photography, art direction, makeup, hairstyling and garments to build a concept and cohesive storytelling

Learning Outcomes:

- Ability to deliver concept/image /story that aligns with the brand DNA, personality or campaign
- Ability to decode stereotype and think image positioning from a different perspective to discover own unique personal style

COURSE CONTENT

UNIT-I INTRODUCTION

- Understanding dynamics of the Image making Industry
- Introduction to media & design culture

UNIT-II VISUAL VOCABULARY, MOOD & STORY TELLING

- Process of client aspiration to concept building
- Harmony of styling with body types, age, occasion and culture
- Fundamentals of cosmetics, make- up, hair Styling and accessorizing

UNIT-III WARDROBE STYLING VS STYLING FOR FASHION BRAND CAMPAIGNS

- Wardrobe styling for occasion & identity creation
- Fashion styling for brand communication and presentation
- Art direction and styling resource management

UNIT-IV- PROJECT 1- WORK SHOP

- Workshop to be conducted by a fashion stylist with the students, culminating in a project based upon styling for a well-known personality.
- Make a final report based on the workshop for the same and final presentation to ajury

UNIT-V PROJECT 2- Styling for a brand campaign

Collection and brand identity brief will be given, below listed are the steps to complete the project

- Build a camping story and style concept to align with collection brief
- Selection of location for shoot & creation of a suitable ambience / backdrop for the shoot
- Sourcing and coordination of clothes and accessories according to collection brief
- Selection of model for communication and presentation, coordination of movement, mood and image of model and apparel
- Hair & make-up
- Photo shoots in the context of camera, lens, light etc
- Selection of final photographs

BBFD 656	DESIGN AND DEVELOPMENT OF KNITWEAR PRODUCTS	0L:1T:3P	2 Credits

Objectives

- To research and analyze current fashion trends in knitwear patterns.
- To develop an understanding of different types of knitted fabrics and their characteristics.
- To analyze design concepts and prepare knitwear patterns for range development and production.
- To develop skills in designing, developing, and producing knitwear fashion products.
- To enhance creativity and technical skills for creating knitwear collections.
- To understand the application of knitted fabrics in contemporary fashion design.

Learning Outcomes

Upon successful completion of the course, students will be able to:

- Explore and identify different types of knitted fabrics and their applications.
- Develop stylized fashion illustrations for knitwear designs.
- Generate and evaluate design concepts for knitwear collections.
- Prepare knitwear patterns suitable for range development and production.
- Design knitwear products according to market requirements and emerging fashion trends.
- Apply technical and creative skills in the development of innovative knitwear collections.
- Demonstrate an understanding of knitwear construction, functionality, and aesthetic appeal.

COURSE CONTENT

AIM

To create a range of knitwear products after thoroughly understanding the market and the needs of customers.

BRIEF

The objective is to explore and develop a range of knitwear products based on the following:

- Research and sourcing of trends (past and present) knit fabrics, embellishments, construction and finishing details etc.
- Selection of a theme (based on inspiration and research) Preparation of a story
- board
- Initial design explorations

- Final Illustrations
- Formulation of specification sheets
- Development of paper patterns
- Sourcing of material required (fabrics, trimmings and accessories) Construction and
- finishing of garments
- Accessorizing the collection
- Presentation of the group collection to ajury

METHODOLOGY

- The class to be divided into groups of four to five students who will interact and support each other in the development of concept ideas by individual research, understanding of technical parameters, market survey and forecast
- Based on the research, a theme should be selected

Collection of at least twenty swatches and selection of the same as per the theme Preparation of a
- color board, story board and a fabric swatch board.
- Development of design options by illustration (men, women and kids)
- Development of paper patterns keeping the design and fabric structure characteristics in perspective
- Development of one finished design with suitable accessories Development of care-label
- for the garment keeping the fabric in mind
- Development of a brand name and a logo for the group's collection and individual font for their designer label.
- At the end the group will make a final presentation under one theme to ajury. The collection should be well co-ordinated and should be well accessorized

Note: The art work and photographs have to be preserved and digitized for compilation towards the development of the Art Portfolio (Semester VIII).

BBFD 657	INTEGRATED DESIGN PROJECT - IV	0L:1T:3P	3 Credits

Context of the Project

The integrated design project should incorporate and integrate the understanding of basic design, elements of design, design process, fashion illustration, pattern making, garments construction, draping and surface ornamentation thereby creating a meaningful correlation and application within the context of fashion. This is done by attempting to evolve an aspired image and then creating a garment, which represents the image for a target customer.

The project will concentrate on encouraging a mature and self-motivated approach towards the final product and completion of work on a creative, original and technically sound either an Indian wear or Western wear.

Having gained proficiency in earlier skills, the students have also been given more advanced and specific inputs on:

I. Design Philosophy

- Concept Development
- Design and development of Indianwear Design and
- development of knitwear products

II. Skills Acquired

- Advanced Photography
- Pattern Grading

III. Knowledge Gained

- Knitting technology
- Fashion Merchandising & Management

IV. Product Development

- Pattern making of Indian wear
- Pattern grading
- Leather sourcing & development of leather products

Project Methodology

Based on all the above inputs received during all the six semesters, two students are required to work together to conceptualize and develop a mini collection of three Indian wear or Western wear outfits. An element of fabric ornamentation to be suitably introduced.

The collection should be based on the criteria of:

- Season
- Categories
- Target market
- Customer profile / psychographics (age group, income, attitude etc.)

The students are also required to accessorize the collection to achieve a complete look.

Note: The art work and photographs have to be preserved and digitized for compilationtowards the development of the Art Portfolio (Semester VIII).

Learning Outcome

- Be able to plan and produce a Indian wear / Western wear collection that demonstrates expertise in all methods of construction and knowledge of technical data for structural components, stitch methods, pressing, finishing and presentation
- Be able to evaluate, analyse and summarize the collection through appropriate styling and accessories.
- Develop an ability to produce a two-dimensional portfolio of work that projects the collection theme and exhibits the evolution of the theme and finalization of the product design and developing of Indian wear / Western wear

BBFD 658	EDUCATION TOUR	0L:0T:0P	2 Credits

Objectives

- To explore different areas relevant to the course through field-based learning.
- To gain practical knowledge and real-world exposure through field studies.
- To develop the ability to handle diverse situations in practical and professional environments.
- To build professional networks through interaction with industry experts, artisans, and organizations.
- To provide exposure to different cultural, industrial, and market environments.
- To enhance observational, analytical, and problem-solving skills through experiential learning.

Learning Outcomes

Upon successful completion of the course, students will be able to:

- Explore and understand diverse cultural, social, and environmental contexts related to design.
- Develop self-confidence, interpersonal, social, and professional life skills.
- Demonstrate managerial attitude, leadership qualities, and professional aptitude.
- Apply theoretical knowledge effectively in practical and real-world situations.
- Analyze market trends and adapt design solutions according to industry requirements.
- Enhance communication, teamwork, and networking skills through field experiences.
- Integrate field observations into creative and market-oriented design practices.

Educational trip programme shall include Historical Places, Monuments, Destinations, Organization, Museums, Archives of artistic, creative, aesthetics and of technologic importance etc. The students are required to maintain a field diary all through the tour, recording every detail and information observed and experienced during the course. The collected information should be documented through visuals, samples and comparative studies and analysis of the same. After such a tour student shall submit a report to the effect what he/she has learnt from the educational tour to the Head of the Department / Principal/ Director.
