MURP308 is a compulsory zero credit training.

Masters in Urban & Regional Planning (MURP)
Proposed Syllabus 2021-22
1ST SEMESTER

Name of the Course: **Masters in Urban & Regional Planning (MURP): First Semester**		
Name of the Subject: **PLANNING THEORY AND TECHNIQUES**		
Subject Code: **MURP101**	Semester: **First**	
Duration: **16 weeks (48 Hours)**	Maximum Marks: **100**	Credits: **3**
Teaching Scheme	**Examination Scheme**	
Lecture : **2 hrs. /week**	External Assessment: **Marks 50**	
Tutorial : **1 hr. /week**	Internal Assessment: **Marks 50**	
Aim: **To study History, Theory and Techniques of Urban and Regional Planning.**		

Contents		Hrs.
Unit - 1	**Evolution of City Building** Relevance of the study of evolution of settlements; Hunter, gatherer, farmer and formation of organized society; Cosmological and other influences, origins and growth of cities, effects of cultural influence on physical form; Human settlements as an expression of civilizations; Basic elements of the city; Concepts of space, time, scale of cities.	
Unit - 2	**Planning History** Town planning in ancient India; Medieval, renaissance, industrial and post-industrial cities; City as a living spatial entity; Concepts of landmark, axis, orientation; City form as a living space; City as a political statement: New Delhi, Chandigarh, Washington D.C. Brasilia etc., Contribution of individuals to city planning: Lewis Mumford, Patrick Geddes, Peter Hall, etc., Dynamics of the growing city, impact of industrialization and urbanization, metropolis and megalopolis.	
Unit - 3	**Definitions and Objectives of Planning** Definitions of town and country planning; Orthodoxies of planning; Goal formulation, objective, scope, limitations; Sustainability and rationality in planning; Components of sustainable urban and regional development.	
Unit – 4	**Theories of City Development and Planning Theories** Theories of city development including Concentric Zone Theory, Sector Theory, Multiple Nuclei Theory and other latest theories; Land use and land value theory of William Alonso; Ebenezer Howard's Garden City Concept; and Green Belt Concept; City as an organism: a physical, social, economic and political entity; Emerging Concepts: global city, inclusive city, safe city, etc.; City of the future and future of the city; Shadow cities, divided cities; Models of planning: Advocacy and Pluralism in Planning; Systems approach to planning: rationalistic and incremental approaches, mixed scanning and middle range planning; Equity planning; Political Economy Model; Types of development plans, plan making process, Role of Goals and Objectives	

Unit – 5	**Survey Techniques and Analytical Models** Data base for physical surveys including land use, building use, density, building age, etc., and socio-economic surveys; Survey techniques; Land use classification or coding and expected outputs; Techniques of preparing base maps including understanding the concepts of scales, components and detailing for various levels of plans like regional plan, city plan, zoning plan, and local area plan. Classification of regions, delineation techniques of various types of regions, analysis of structure of nodes, hierarchy, nesting and rank size; Scalogram, Sociogram, etc.; Planning balance sheet; Threshold analysis; Input output analysis, SWOT analysis	
Unit – 6	**Demographic methods and Planning Standards** Methods of population forecasts and projections; Lorenz Curve, Ginni Ratio, Theil's index, rations: urban – rural, urban concentration, metropolitan concentration; Location dimensions of population groups – social area and strategic choice approach – inter connected decision area analysis. Spatial standards, performance standards and benchmarks, and variable standards; UDPFI guidelines, zoning regulations and development control rules and regulations.

1	Visit to Planning Organization / Department and submit Report on adoption of Concepts and Theories by them.			
2	Visit to a Local Body / Development Authority and submit report with relevance to adoption of Planning Techniques by them.			

Name of the Course: **Masters in Urban & Regional Planning (MURP): First Semester**		
Name of the Subject: **SOCIO - ECONOMIC PLANNING**		
Subject Code: **MURP102**	Semester: **First**	
Duration: **16 weeks (48 Hours)**	Maximum Marks: **100**	Credits: **3**
Teaching Scheme	**Examination Scheme**	
Lecture : **2 hrs. /week**	External Assessment: **Marks 50**	
Tutorial : **1 hr. /week**	Internal Assessment: **Marks 50**	
Aim: **To develop understanding with relevance to Socio-economic Issues in Urban and Regional Planning.**		

Contents		**Hrs.**
Unit - 1	**Nature and Scope of Sociology** Sociological concepts and methods, man and environment relationships; Socio-cultural profile of Indian society and urban transformation; Tradition and modernity in the context of urban and rural settlements; Issues related to caste, age, sex, gender, health safety, and marginalized groups; Displacement, resettlement and rehabilitation due to compulsory land acquisition.	
Unit - 2	**Community and Settlements** Social problems of slums and squatter communities, urban and rural social transformation and their impact on social life, safety, security; Crimes in urban areas and their spatial planning implications, social structure and spatial planning; Role of socio-cultural aspects on growth patterns of city and neighborhood communities; Social planning and policy, and community participation; Marginalization and concepts of inclusive planning, and gender concerns in planning. Settlement Policy: National Commission on Urbanization, Rural Habitat Policy and experiences from developing countries regarding settlement structure, growth and spatial distribution.	
Unit - 3	**Elements of Micro and Macro Economics** Concepts of demand, supply, elasticity and consumer markets; concept of revenue costs; Economies of scale, economic and social costs, production and factor market; Different market structures and price determination; market failures, cost-benefit analysis, public sector pricing; Determinants of national income, consumption, investment, inflation, unemployment, capital budgeting, risk and uncertainty, and long-term investment planning.	
Unit - 4	**Development Economics and Lessons from Indian Experiences** Economic growth and development, quality of life; Human development index, poverty and income distribution, employment and livelihood; Economic principles in land use planning; Policies and strategies in economic planning, balanced versus unbalanced growth, public sector dominance; changing economic policies, implications on land.

List of Exercises / Practical:				
1.	Visits to a Village / Small town to ascertain Socio-economic Impact of Development and submit Report.			

Name of the Course: **Masters in Urban & Regional Planning (MURP): First Semester**			
Name of the Subject: **TRAFFIC & TRANSPORT PLANNING**			
Subject Code: **MURP103**	Semester: **First**		
Duration: **16 weeks (48 Hours)**	Maximum Marks: **100**	Credits: **3**	
Teaching Scheme	**Examination Scheme**		
Lecture : **2 hrs. /week**	External Assessment: **Marks 50**		
Tutorial : **1 hr. /week**	Internal Assessment: **Marks 50**		
Aim: **To study the Elements of Infrastructure and Role of Transport in Urban and Regional Planning.**			

Contents		Hrs.
Unit - 1	**Introduction to Basic Concepts** Definition, concepts, scope and utility of traffic engineering; relationship between the traffic flow variables, fundamental diagrams of traffic flow ; Definition of capacity and level of service, factors affecting capacity and level of service, static and dynamic PCU, Design service volume, capacity norms for urban roads with different widths.	
Unit - 2	**Design of Urban Road Infrastructure** Urban Road cross-sectional elements- right of way, carriageway, median, service lane, footpath, curb, camber, side slope, service road etc. for different hierarchy of urban roads; geometry of horizontal curves and vertical curves of urban roads, super elevation, sight distance, access control etc. along urban roads ; Street Lightings types and design ; guard rails; traffic signs and marking; NMT facilities, road landscape design features on urban roads.	
Unit - 3	**Design of Intersections** Types of intersections, visibility, Design principles – alignment and vertical profile, visibility, radii of curves, channelization; roundabouts- capacity and design; capacity of signalized intersection; Grade separated intersection design elements- ramp gradient, acceleration and deceleration lanes ,weaving sections, etc..	
Unit - 4	**Traffic Management Systems and Safety** Introduction to traffic signals, warrant for signals, phasing and inter green period, saturation flow, optimization of signals, Vehicle actuated signal facilities, co-ordination of traffic signal, area traffic control system; Basic principles of regulation and its enforcement; Traffic management measures, Transport System Management techniques, Road safety- collection and analysis of accident data, accident prevention strategies.	
Unit - 5	**Transport Infrastructure Planning, Management and Design** Role of transport, types of transport systems, evolution of transport modes, transport problems and mobility issues**;** Urban form and Transport patterns, land use – transport cycle, concept of accessibility; Hierarchy, capacity and geometric design elements of roads and intersections**;** Basic principles of Transport infrastructure design; Traffic and transportation surveys and studies, traffic and travel characteristics; Urban transport planning process – stages, study area, zoning, data base, concept of trip generation Transport, environment and safety issues;	

	principles and approaches of traffic management, transport system management.

5.	L. R. Kadiyali	Traffic engineering and transportation planning	2007	Khanna Publishers, New Delhi

List of Exercises / Practical:	
1	Visit to Traffic and Transport Section of Local Bodies / Development Authority and submit report on the aspect of Design.

Name of the Course: **Masters in Urban & Regional Planning (MURP): First Semester**			
Name of the Subject: **ENVIRONMENTAL PLANNING & MANAGEMENT**			
Subject Code: **MURP104**	Semester: **First**		
Duration: **16 weeks (48 Hours)**	Maximum Marks: **100**	Credits: **3**	
Teaching Scheme	**Examination Scheme**		
Lecture : **2 hrs. /week**	External Assessment: **Marks 50**		
Tutorial : **1 hr. /week**	Internal Assessment: **Marks 50**		
Aim: **To study Theory of Environmental Planning and management.**			

Contents		Hrs.
Unit – 1	**Concepts of Ecology, Ecosystem and Environmental Planning** History of Environmental Planning, Development of habitat patterns, settlement structure and form in response to environmental challenges; Concepts of Ecology and Ecosystem, Urban Ecosystem.	
Unit – 2	**Resource Analysis and Conservation** Resource analysis for various ecosystems and development imperatives (land, geology, soil, climate, water, vegetation) characteristics, exploitation, causative factors for degradation, analytical techniques.	
Unit – 3	**Environmental Zones** Environmental Zones (Hill, Coastal, Arid), characteristics, resources, settlements pattern, problems and potentials, regulating mechanisms for development.	
Unit – 4	**Environmental Policies, Significant Conventions, Conferences** Environmental Policies and initiatives including policies, strategies, protocols, treaties and agreements.	
Unit – 5	**Environmental Management, Appropriate Technologies & Management** Resource Management: Including management of land, water bodies and water channels, forests and wildlife, minerals. Management of Urban Areas; Management of sensitive areas – hills, coasts, arid, wetlands etc. (including participatory approaches); management of Watersheds. Techniques and case studies related to water harvesting, water treatment, recycling, waste disposal, waste minimization, and their implications. Low cost and cleaner technologies. Models of Collaboration Environmental Planning.	
Unit – 6	**Alternate Energy Technologies** Technologies related to alternate energy- Solar, Biomass, Biogas, Hydro, Wind, Nuclear and their usefulness for environment.

List of Exercises / Practical:				
1	Visit to Public Health Engineering Department of Local Bodies / Development Authority / State Government and submit report.			

Name of the Course: **Masters in Urban & Regional Planning (MURP): First Semester**		
Name of the Subject: **HOUSING, RESETTLEMENT & REHABILITATION**		
Subject Code: **MURP105**	Semester: **First**	
Duration: **16 weeks (48 Hours)**	Maximum Marks: **100**	Credits: **3**
Teaching Scheme	**Examination Scheme**	
Lecture : **2 hrs. /week**	External Assessment: **Marks 50**	
Tutorial : **1 hr. /week**	Internal Assessment: **Marks 50**	
Aim: **To provide an Exposure to the Basic Housing and Planning Concepts and Issues.**		

Contents		Hrs.
Unit - 1	**Concepts and Definitions** Shelter as a basic requirement, determinants of housing form, Census of India definitions, Introduction to policies, housing need, demand and supply, dilapidation, structural conditions, materials of constructions, housing age, occupancy rate, crowding, housing shortage, income and affordability, poverty and slums, houseless population. Various housing typologies viz. traditional houses, plotted development, group housing, multi-storied housing, villas, chawls, etc.	
Unit - 2	**Urban Housing** Understanding housing as an important land use component of city plan / master plan, considerations for carrying out city level housing studies, projections, land use provisions; Suitability of land for housing, housing stress identification, projecting housing requirements, calculating housing shortages, housing allocation.	
Unit - 3	**Housing policies and programs in India** Refugee settlements, employee housing program, National Housing Policy 1988, NHP1994, National Housing and Habitat Policy 1998, National Urban HHP 2007, National Rural Housing and Habitat Policy. Programs: Rajiv Awas Yojana, Indira Awas Yojana, Pradhan Mantri Awas Yojana etc.	
Unit - 4	**Land Development and Resultant Resettlement** Land Acquisition Models and Practices in India and elsewhere for projects. Compulsory Acquisition, land sharing and adjustment models, land pooling, negotiated land acquisition. Development induced relocation – voluntary and involuntary resettlement; Resettlement and Rehabilitation Policies. Policies of multi-lateral / bilateral funding institutions: World Bank, Asian Development Bank Policies, National Policy on Resettlement and Rehabilitation and State Policies on R and R and Sector Specific Policies in large projects such as Multi-Purpose Dam Projects, Mining projects, Highway projects, SEZ, etc., Land Acquisition Act 1987, Land Acquisition, Rehabilitation and Resettlement Act 2013	
Unit - 5	**Impact of Resettlement and Rehabilitation (R and R) Plan** Poverty and Social Impact Assessment for Development projects: Linear Projects (Roads, railways, etc.), vis-à-vis non-linear projects (Township / industrial area development, dams, forests). Impact on vulnerable and indigenous groups: Project	

	Affected People and Project Affected Assets, Impact on Women and Children, Gender Action Plans. Resettlement Plan: Context, content, structure, principles and practices: Economic, social and physical implications of resettlement and rehabilitation. Resettlement options and strategies, Self-relocation and project facilitated relocation; Case studies in Resettlement and Rehabilitation in Development Sectors: Mining, Highways, Power, industrial and township development. Flood affected areas and other infrastructure projects such as Mumbai Transport Project.	
Unit - 6	**Participation as an Important Tool for Resettlement and Rehabilitation** Use of Participatory tools for Resettlement Planning. Institutional arrangements for R and R – Role of NGOs / CBOs and other local, state, national and international organizations in resettlement and rehabilitation, Monitoring and Evaluation of R & R interventions.

List of Exercises / Practical:

1	Visit to Regional Office of HUDCO or State Housing Board and submit report.

Name of the Course: **Masters in Urban & Regional Planning (MURP): First Semester**		
Name of the Subject: **PLANNING STUDIO-I**		
Subject Code: **MURP106**	Semester: **First**	
Duration: **16 weeks (160 Hours)**	Maximum Marks: **500**	Credits: **10**
Teaching Scheme	**Examination Scheme**	
Tutorial : **3 hrs. / week**	External Assessment (Viva only): **Marks 250**	
Practical : **7 hrs. / week**	Internal Assessment (TA only): **Marks 250**	
Aim: **To provide Appreciation of Site Planning, Area Planning, and Local Area Development Plan.**		

First Assignment

Film Appreciation (Individual Assignment)

Films related to city development and socio-economic issues will be screened for students. The purpose of these films is to educate the students' understanding of various development issues and to absorb them in the planning practice. At the end of the film, a discourse around the film will also be held.

After viewing the films, each student is expected to write about its main focus, city / region context, its applicability to Indian environment by answering the given questions in not more than half a page.

Second Assignment

Literature Review (Individual Assignment)

Each student is expected to read the article given from a journal / book and write a summary of not more than a page (250 words only) highlighting the problem, approach, methodology, analysis, how the author arrived at the conclusion and its relevance to Indian context. There will be a negative marking for writing the same text as in the original (that is copying from the original text given to them).

Third Assignment

Area Appreciation (Group Assignment)

The aim of the area appreciation exercise is to enable the students to understand and contextualize the location of the area in relation to the city, zone and area in which the particular place is situated. This is done in relation to the socio-economic, spatial and cultural characteristics of that city, zone, location, etc. The main purpose is to make the students appreciate the locational attributes of land parcels for future development in a city.

Due to the size of the area, this exercise is done in groups of students being assigned to a particular area.

The following planning issues at area level should be identified:

- Review of the Master Plan / Zonal / Area plan in relation to the selected areas.
- Appreciation / Analysis of ward level data.
- Perception of areas in terms of legal / illegal / authorized / unauthorized, Slums, Urban Aesthetics.
- Social Categorizations of people - Type of population living, people's perception about area and its planning problems.

Fourth Assignment

Site Planning (Individual Assignment)

Site planning is a process whereby the optimum utilization of potential of site is considered recognizing the constraints the site has. It uses 3 dimensional space of the site and the associated locational

advantages, human activities and the regulations that are assigned to a particular site.

The site is developed using a set of standards / norms in a given context which varies from location to location. A student is expected to understand the intricacies and interface between various variables such as soil conditions, topography, environmental dimensions, location, spatial standards applicable to the site, etc.

Fifth Assignment

Local Area Development Plan (Group Assignment)

A City is a multi-dimensional, dynamic and a futuristic space. Understanding city involves appreciating this multi direction, and include them in the city making process. A job of physical planner does not merely understand the current conflict in development but to emerge out of this and to come out with a vision for the city. To arrive at this vision, a planner needs to understand the dynamics of various components of the city and how and what level interventions can be made to achieve that vision.

A group of students are expected to study an identified local area in terms its present problems and issues and project a futuristic vision in terms of scenario building.

List of Exercises / Practical:

1	Visit to Local Planning Agency and Field Visit for Data Collection and submit Report.

2nd SEMESTER			
Name of the Course: **Masters in Urban & Regional Planning (MURP): Second Semester**			
Name of the Subject: **METROPOLITAN & REGIONAL PLANNING**			
Subject Code: **MURP201**	Semester: **Second**		
Duration: **16 weeks (48 Hours)**	Maximum Marks: **100**	Credits: **3**	
Teaching Scheme	**Examination Scheme**		
Lecture : **2 hrs. /week**	External Assessment: **Marks 50**		
Tutorial : **1 hr. /week**	Internal Assessment: **Marks 50**		
Aim: **To study the Growth of Metro and Mega Cities and their relationship with their respective Regions; and spatial planning approaches for their Planned Development.**			

Contents		Hrs.
Unit – 1	**Urban Growth and System of Cities** Growth of cities scale, complexity and its impact on national development, cities as engines of growth, cities as ecosystems, resources in cities. Concepts, approaches, strategies and tools; Policies and programs at various levels, impact on metro and mega city development.	
Unit – 2	**City – Region Linkages** City, fringe and the periphery - physical and functional linkages, peri-urban development.	
Unit – 3	**Metro and Mega Cities: Problems and Issues** Growth trends and processes, characteristics, problems, concepts and concerns of urban sustainability, issues related to diversity and unintended growth, economic, social and environmental sustainability, quality of life, inclusivity and equity, climate change, transit oriented development, participatory planning. Inner city – issues and problems, approach to development.	
Unit – 4	**Concepts and Typology of Regions and Regional Dynamics** Basic Concepts in Regions, Defining a region: fluidity and purposiveness, Typology of Regions: Resource Regions, Mega, Macro, Meso, and Micro Regions; Regional Dynamics: Growth of Mega and Metro Regions: Scale, Complexity and its impact on national and international scenario, convergence and divergence. Regional Economy, competitiveness among regions, backward and leading regions in development; Special Regions: SEZ, Agro Regions, Ecological regions, etc. Core, Fringe and Periphery in a Region and its planning; Tools and techniques available for planning regions in India; Role of 73rd and 74th Constitution Amendment Acts in regional plan preparation and implementation.	
Unit – 5	**Regions, Resources in India and Its Planning** Regions in Indian Context: Resource Regions, Corridors as regions, National, sub-national and State as a region, macro, meso and micro regions in India. Case Studies from India: NCR and Delhi Mega Region, Mumbai Mega Region, Kolkata Metro Region, Chennai Metro Region, and other Metro Regions in India. Western and Eastern Ghats, North Eastern Region, Coastal Regions, and River Valley Regions; Corridors: Golden Quadrilateral, Delhi-Mumbai, Chennai-Bangalore Industrial Corridor, North-South and East-West Corridor Regions.

List of Exercises / Practical:

1	Visit to a case study town and submit report on EIA.

Name of the Course: **Masters in Urban & Regional Planning (MURP): Second Semester**		
Name of the Subject: **PLANNING LEGISLATION & URBAN GOVERNANCE**		
Subject Code: **MURP204**	Semester: **Second**	
Duration: **16 weeks (48 Hours)**	Maximum Marks: **100**	Credits: **3**
Teaching Scheme	**Examination Scheme**	
Lecture : **2 hrs. /week**	External Assessment: **Marks 50**	
Tutorial : **1 hr. /week**	Internal Assessment: **Marks 50**	
Aim: **To study the Role of Government, Private Sector and the Third Sector for Governance of Cities and Regions.**		

Contents		Hrs.
Unit - 1	**Overview of Urban Governance** Definition, concepts, components, government and governance, hierarchy and structure, forms of governance, process of inclusion and exclusion,	
Unit - 2	**Legislations pertaining to Urban Governance** Institutional frame and mechanism for urban governance as envisaged in the 73rd and 74th Constitution Amendment Acts.	
Unit - 3	**Institutions and Organizations** Differences between institutions and organizations; approaches to understanding organizations; types, structure and functions, their interface and conflicts, reach, and their effectiveness; Methods, process and evaluation; Present organizations and involved in urban governance.	
Unit - 4	**Urban Local Governance and Participatory Processes** System, structure, functions, powers, process and resource, performance, interface with NGO's, other agencies. Stakeholders' participation, roles and responsibilities, access to government by various stakeholders.	
Unit - 5	**Law, Indian Constitution Evolution of Planning Legislation** Sources of law: custom, legislation and precedent; Meaning and terms of law: legislation, ordinance, bill, act, regulation, and bye-laws; Significance of law and its relationship to urban and regional planning, benefit of statutory backing, eminent domain powers and police powers; Concepts and contents related to planning, provision regarding property rights, legislative competence of Local, State and Central government to deal with various matters concerning Town and Country Planning; An over view of legal tools connected with urban and regional planning and development. Town and Country Planning Act, Improvement Trust Act, Development Authorities Act: objectives, content, procedures for provision an implementation of regional plans, master plans and town planning schemes; Concept of Arbitration, betterment levy development charges and public participation in statutory planning process, concept of structure plan, local plan and action plan under the Law. National Environmental Policy Act; Environmental Protection Act; Land Acquisition Act: Concepts, procedure for compulsory acquisition of property and determination of compensation. Acts pertaining to SEZ; disaster management, and legal aspects of innovative techniques such as Transfer of Development Rights, Accommodation Reservation (AR), Air Rights, etc.	

Unit - 6	**Habitat Laws and Significance, Development Control & Professional Practice** Laws relating to Slum Clearance, environment, housing, landscape and traffic, Laws relating to conservation and restoration, historical monuments, archaeological sites and remnants of national importance; contract management and execution of projects; Objectives of legal tools, critical evaluation of zoning, sub-division regulations, building regulations and bye-laws, development code zoning, periphery control, land conversion in the peri-urban areas. Aims and objectives of professional institute, sister bodies, professional role and responsibility of planning consultants, professional ethics and code of conduct and scale of professional charges. International Agreements (GATT and WTO) and its impact in India. Formulation of Consultancy project proposal and outlines (EOI, RFP, etc); Formulation of Consultancy Contract Agreement and Contract Management Scale of Professional Charges, and Collaborative projects; Role of Inter-Disciplinary groups; appreciation of decision making process and the process in relation to varied consultancy assignments in planning. Management of office and personnel.

3.	Bruton, M.J.	Introduction to Transport Planning		
4.	Catanese, A.J.	New Perspective in Urban Transportation Research	1972	Lexington Books

List of Exercises / Practical:

1	Visit to a Transport Planning Cell / Section of Development Authority and submit report.

Name of the Course: **Masters in Urban & Regional Planning (MURP): Second Semester**		
Name of the Subject: **PLANNING STUDIO - II**		
Subject Code: **MURP206**	Semester: **Second**	
Duration: **16 weeks (160 Hours)**	Maximum Marks: **500**	Credits: **10**
Teaching Scheme	**Examination Scheme**	
Tutorial : **3 hrs. / week**	External Assessment (viva only): **Marks 250**	
Practical : **7 hrs. / week**	Internal Assessment (TA only): **Marks 250**	
Aim: **To carry out City Based Study focusing Planning and Design.**		

Contents		Hrs.
Unit - 1	**Geo-Informatics Laboratory Training** The laboratory training will be conducted in accordance with the studio exercise. Introduction to Geo-informatics, introduction to Remote Sensing – Aerial and Satellite; introduction to GIS, Spatial data and Attribute data; Satellite images as input to GIS; Collection and presentation of baseline information.	
Unit - 2	**Development Plan** The studio exercise focuses on the planning, development and design aspect (in line with the other core and elective courses offered in the semester). The exercise pertains to large cities and emerging metropolitan cities and ranges from preparation of sustainable development plans to sector specific themes pertaining to tourism, SEZs, etc. The studio exercise enables students to develop an approach/ framework for the task; it is field based as a database is generated that is analyzed and the plan and strategies are formulated. Initial study involves understanding of the exercise through theories, study of similar case studies, awareness of relevant norms and standards through extensive literature search. Students are required to prepare a comprehensive list of required data and identify probable sources before making a field visit to the case study town/city. Students are encouraged to translate learning from the core and elective subjects to the studio exercise. The introduction of GIS in the studio enables them to apply it in the studio exercise. Students are expected to analyze the data collected and come out with proposals and recommendations for planned development of the city. The entire exercise is also documented in the form of a technical report. The second exercise is a short and intensive exercise of one-month duration. It pertains to topical issues i.e. property tax reforms, informal sector, development of railway land, etc. The study is based on primary surveys and students are expected to analyze the information and arrive at recommendations.

Lecture : **2 hrs. /week**	External Assessment: **Marks 50**	
Tutorial : **1 hr. /week**	Internal Assessment: **Marks 50**	
Aim: **To apprise the students of the local governance at sub provincial level and resource mapping of local governments with special emphasis on municipal governments in out country**		

Contents		**Hrs.**
Unit - 1	**Institutions in Planning** Type of institutions, their role and relevance (legal, political, social, cultural and economic institutions), formal and informal institutions and spaces- their interface, conflicts, reach and their effectiveness in planning; analyzing the institution; methods, process and evaluation; role of the state in planning; market facilitative, regulatory and monopoly power	
Unit - 2	**Institutions and Organizations** Formal and informal institutions such as constitutions, electoral rules, property rights and civil rights. How and why people in different groups, countries and cultural context of institutions to facilitate collective action. Whether different groups construct distinctly different institutions to deal with similar problems and why similar institutions seem to work differently in different distinct societies; different between organizations and institutions, government and governance; organizations: types, concepts, theories, structure and functions: approaches to understanding organizations. Institutional building: factors and processes, institution process and networks- how the network operates; present organizations dealing with urban and regional planning. Post 73rd and 74th constitution amendment act, environment and the modified role and functions of local bodies, local authorities, district authorities and state level agencies; case studies	
Unit - 3	**Decentralization of Powers** Development planning and Indian state- centralization, powerlessness, decentralization; the institutional frame and mechanism for urban governance as envisage in 73rd and 74th constitution amendment act, transfer of power from centre to state and state to local government, role of the existing planning and development agencies in various states in the light of constitution amendment act; role of various institutions in the governance process and access to government by various stakeholders	
Unit - 4	**Network Governance** Role of the state in relation to other stakeholders (NGOs, private sector. Scientific network and international institutions), new state spaces; invited and contested spaces; changing role of the state- emergence of middle class and its socio-political space, collective bargaining and collective action; role of donor agencies; advanced locality management, resident welfare associations and other agencies in the	

	governance system. Role of people's participation in planning process: process of inclusion and exclusion in governance. E-governance and grievances, redresses system

List of Exercises / Practical:

1.	Visits to

Name of the Course: **Masters in Urban & Regional Planning (MURP): Third Semester**		
Name of the Subject: **RESEARCH METHODOLOGY, SEMINAR AND REPORT WRITING**		
Subject Code: **MURP303**	Semester: **Third**	
Duration: **16 weeks (48 Hours)**	Maximum Marks: **100**	Credits: **3**
Teaching Scheme	**Examination Scheme**	
Lecture : **2 hrs. /week**	External Assessment: **Marks 50**	
Tutorial : **1 hr. /week**	Internal Assessment: **Marks 50**	
Aim: **To understand the research techniques, collection, analysis and interpretation of data and representation of data, research design with relevance to Urban and Regional Planning.**		

Contents		Hrs.
Unit - 1	**Introduction to Research Methodology** Objective of Research, Types of Research, Research Methods and Methodology, Scientific method of Research, Research Process. Types of research in architecture, areas of research in architecture, qualitative and quantitative paradigms	
Unit - 2	**Research Problem** Definition of Research Problem, Selection of Research Problem, Need for defining the Problem, Techniques for defining a Problem, Development of hypothesis	
Unit - 3	**Research Design** Components of research design – formulating the research questions, hypothesis, choosing the sample, methods of data collection, analyzing the data and inferring from the data. Concepts of dependent and independent variables, unit of analysis. Defining the scope and limitations of a research plan, significance of the research outcome. Preparing time schedule & budget for a research plan.	
Unit - 4	**Referencing Information Sources** Using secondary sources of information: using an Encyclopaedia, bibliography card, translation card catalogue information, periodic indexes and usage, compiling preliminary bibliography; Referencing documentation sources: styles of footnotes, endnotes etc., model bibliography entries.	
Unit - 5	**Sampling Design: Quantitative and Qualitative** Quantitative data collection: Census and Sample survey, Implication of Sample design, Steps in Sampling, Characteristics of a good Sample design, Types of Sample design. Methods of qualitative data collection in Architecture: Interview Techniques: Questionnaires /Face to face Interviews / Internet survey. Designing a Questionnaire / Interview schedule. Visual Techniques: Observations (participant / non-participant / direct), activity mapping, accession/erosion trace observations, cognitive maps, etc.	

Unit - 6	**Analysis** Quantitative Content Analysis: Secondary data analysis: Understanding the relative advantages, disadvantages and application of various methods mentioned above and choosing a method appropriate for a research to achieve its objectives. Data Documentation and Analysis: Understanding the nature of data collected and methods of analysis suitable for that data (graphical / numerical / descriptive).Converting data into numerical form for data analysis.	
Unit - 7	**Introduction of Statistics** Introduction to the simple statistical methods of analyzing numerical data – frequencies / percentages, mean / median / mode, correlation, chi square test – inferring from the data and interpreting the meaning of those inferences. Use of MS Excel for statistical data analysis. Presentation & Reporting: Presentation of the Data: Techniques of presenting the numerical data – graphical (pie charts, bar charts, line graphs etc.), tabulations, verbal qualitative data, architectural drawings / maps.	
Unit - 8	**Reporting the research** Different sections of a research report, technical writing and language (tense, voice, etc.), formatting of a report.

Contents		Hrs.
Unit – 1	**Introduction** Decentralized Planning in India- Historical perspective, Current scenario- recent development in decentralized district level planning, 73rd and 74th Constitution Amendment Act, participative District Planning; Role of Planning Commission and Finance Commissions, ICT in District Planning	
Unit – 2	**District Planning** Data management and district level visioning, Institutional and other support for District Planning Committee, bridging gap through district planning, resource mapping and determination of funding sources, consolidation of urban and rural plans; multi-sector and multi-level integrated approach to planning (vertical and horizontal spatial integration); rural-urban spatial relationship; District development plans- guidelines for district planning; content and context and methodologies; Village development plans- an integrated approach, rural norms and standards (spatial); capacity building for decentralized planning; democratizing information; using media for district development.	
Unit – 3	**Rural Development-I** Introduction; meaning and scope and overview of rural development; historical perspective- rural development in India; problem/perception and identification; rural area planning- programs, policies, schemes for rural development, their coverage and outcomes; rural infrastructure development, Bharat Nirman- a business plan for rural infrastructure; Rural Building Centers, PMGSY, IAY, Rajiv Gandhi Technology Mission, Central Rural Sanitation Programme, PURA, Rural Employment Schemes; Mahatma Gandhi national Rural Employment Guarantee Act, 2005; Sampoorna Grameen Yoyana, National Social Assistance Programme, Command Area Program, Drought Prone Area Program, Backward Area Development Program, North Eastern Development Program, Technology Missions: Water, Sanitation, Electrification etc.	
Unit – 4	**Rural Development-II** Changing profile of rural areas of India; Consumption pattern changes, land utilization changes, cropping pattern changes, holding size changes, changes in asset ownership, its implication in the planning process; rural settlement analysis; Types, activity, environment and economic interface in rural habitat, technology in rural settlement; land utilization, types of land utilization and its relevance to planning; land conversions and its regulation/ facilitation in peri-urban areas; land	

	utilization analysis; common property and its use, tenancy and ownership, holding size and its relevance, irrigated and non-irrigated land values; sources of information for land, Information Technology in rural development, ICT in rural development, rural information system, weather forecasting, disaster minimization, market information etc. E-panchayats, energy efficient technologies and alternative technologies; inclusive development; special component plan- tribal sub plan and weaker sector plan allocation, implementation, monitoring and evaluation; North Eastern Plan

List of Exercises / Practical:

1	Visit to

Name of the Course: **Masters in Urban & Regional Planning (MURP): Third Semester**			
Name of the Subject: **URBAN DESIGN AND CONSERVATION**			
Subject Code: **MURP305**	Semester: **Third**		
Duration: **16 weeks (48 Hours)**	Maximum Marks: **100**	Credits: **2**	
Teaching Scheme	**Examination Scheme**		
Lecture : **2 hrs. /week**	External Assessment: **Marks 50**		
Tutorial : **1 hr. /week**	Internal Assessment: **Marks 50**		
Aim: **To provide an Exposure to the Basic Housing and Planning Concepts and Issues.**			

Contents		Hrs
Unit - 1	**Introduction to urban design** Early examples of Urban Design in classical and pre-industrial cities – Heritage and the roots of our modern concepts in urban design, Objectives and scope of urban design, Basic functions, principles and techniques. Value enhancement, aesthetics and conservation aspects.	
Unit - 2	**Parts of urban design** Surveys in Urban Areas, Scale in Urban design, urban mass, perceiving & mapping a city, Urban Space. Urban activity & circulation. Examples at regional, metropolitan, Urban and project level, Designing the parts of city - central areas, the town center, civic spaces, shopping centers, Industrial Areas and estates. Residential areas & Housing.	
Unit - 3	**Techniques of urban design** Techniques of Urban Design with emphasis on public policies, conservation and economic considerations, Road forms, serial, grid-iron, Hierarchy of access routes - Pedestrian areas and malls & Urban elements, Legal aspects, Planning and Design parameters for New towns; studying of emergent techniques of urban design such as tactile city, ephemeral city, guerrilla intervention, soft intervention, compact city, walkable city, slow city, instant city, zero carbon city, smart city etc.	
Unit - 4	**Introduction to Vernacular architecture** Introduction to Vernacular architecture - nature, purpose and scope. Importance of sustainable material, resources, climate-sensitivity, Creativity and design in limited means.	
Unit - 5	**Vernacular as a shelter** Study of examples of Vernacular architecture in history of the world architecture, with a special emphasis on Indian architecture to understand shelter based on functions, building materials and construction techniques, art and craft, local conditions, traditions, climate and geography, religion & culture.	
Unit - 6	**Learning from Vernacular** Works of architects in contemporary architecture whose works are influenced by the Vernacular Architecture of the region. Details adapted in modern context by using old/new materials , systems and contexts; studying examples in Indian context, studying of works of various Indian architects with respect to interpretation of vernacular architecture in modern context

Name of the Course: **Masters in Urban & Regional Planning (MURP): Third Semester**			
Name of the Subject: **ENERGY AND CLIMATE CHANGE (ELECTIVE-II)**			
Subject Code: **MURP306-B**	Semester: **Third**		
Duration: **16 weeks (48 Hours)**	Maximum Marks: **100**	Credits: **2**	
Teaching Scheme	**Examination Scheme**		
Lecture : **2 hrs. /week**	External Assessment: **Marks 50**		
Tutorial : **1 hr. /week**	Internal Assessment: **Marks 50**		
Aim: **To understand the causes of climate change, factors of energy consumption and their mitigation.**			

Contents		Hrs.
Unit - 1	**Introduction** Energy, climate change and urban development interface; early history of research in global warming, Rachel Carson, PAT theory, measuring global warming, global warming and climate change, various conventions on climate change, Kyoto protocol, Vienna Convention, Paris Convention, United Nation Framework for Climate Change, 2 degree reduction, 1.5 degree reduction, various countries on climate change, India's response towards climate change, IPCC, Habitat III etc.	
Unit - 2	**Energy generation and consumption** Energy supply and demand; energy consumption in cities; determinants of energy demand, phenomenon of climate change, factors influencing climate change, climate change and urbanization, climate change and peri-urban and rural areas, impacts of climate change, impact of climate change on Indian cities, impact of climate change on peri-urban and rural areas of India, measuring the impact using various techniques, use of GIS to measure the impact of climate change, study of Urbanization Index, UII, NVDI, NWDI, Shannon's entropy, centrality etc.	
Unit - 3	**Energy planning and management, Mitigation and Adaptation to climate change** Energy efficient development, compact city form, transit oriented development, mechanisms and measures for mitigating and adapting to climate change at various levels	
Unit - 4	**Plans, Policies and Strategies** Various policies and strategies taken for climate change mitigation and adaptation, Sustainability Development Goals, implementation of such goals in various countries and India, National Action Plan on Climate Change, State Action Plan on Climate Change, performance of various states, National Adaptation Fund, National Mission on sustainable Habitat, Smart city concept, Smart City Mission in India, performances of various states under Smart City Mission

Name of the Course: **Masters in Urban & Regional Planning (MURP): Third Semester**		
Name of the Subject: **LAND MARKET AND MANAGEMENT (ELECTIVE-II)**		
Subject Code: **MURP306-C**	Semester: **Third**	
Duration: **16 weeks (48 Hours)**	Maximum Marks: **100**	Credits: **2**
Teaching Scheme	**Examination Scheme**	
Lecture : **2 hrs. /week**	External Assessment: **Marks 50**	
Tutorial : **1 hr. /week**	Internal Assessment: **Marks 50**	
Aim: **To develop understanding of market forces, demand-supply, pricing and development of land.**		

Contents		Hrs.
Unit - 1	**Land Economics, Land Policy and Land Markets** Economic principles of land use, concept of rent and its application, demand forecasting for land, factors affecting land supply and demand; market conditions-formal and informal, legal and illegal,; instruments of land policy and impact on markets; planning instruments, market development instruments, financial development instruments, fiscal instruments, other supportive instruments; market by government ang government by markets; regulation, monopoly power and its use, private development, rent-seeking and its impact on land supply, access to land by various segments of population, PPP in land	
Unit - 2	**Supply Side Management** Property rights; ownership, user and exchange rights; its implication on land supply, land development; type, cost, methods of disposal, corruption and land markets; corruption, black money and land markets; relation between land, share and gold markets, regulation in land markets, social justice and land distribution, collective action of the state and regulation of its supply of land- overall impact of regulation on land prices; master plan, zoning and other planning regulations and their impact on supply. Land Management Techniques: private land assembly, co-operatives in land development, FDI in land development, land pooling and plot reconstitution, transfer of development rights, land sharing and land lease	
Unit - 3	**Demand Side Management** Income elasticity of land, business cycles and its impact on demand for land, externalities and internalities in land development and induced demand, economic growth and demand for land; changes in tastes and preferences and its effect on type of land; poor and their demand; physical, fiscal, financial and legal incentives for inducing or restricting the demand for land; mega investments and its effects on land	
Unit - 4	**Land pricing and Real Estate Markets** Land valuation techniques, land pricing, subsidies, auctions; type of developments; plotted, flatted system, and their effect on land pricing, hedonistic pricing, land price behavior in urban centers, constructing the land price index; market conditions-real estate cycles, market efficiency, market forecasting, cartels, collusion, rent seekers and real estate market, agents in reals estate markets, risks, real estate regulatory bill and its likely impact; land information system, land record in rural areas (examples from Karnataka, Andhra Pradesh etc.), transparency in land transaction, methods of publicizing land prices and land price monitoring

List of Exercises / Practical:				
1	Visit to			

Name of the Course: **Masters in Urban & Regional Planning (MURP): Third Semester**			
Name of the Subject: **PLANNING STUDIO III & THESIS –I**			
Subject Code: **MURP307**	Semester: **Third**		
Duration: **16 weeks (160 Hours)**	Maximum Marks: **400**	Credits: **9**	
Teaching Scheme	**Examination Scheme**		
Tutorial : **3 hrs. / week**	External Assessment (viva only): **Marks 100+100=200**		
Practical : **7 hrs. / week**	Internal Assessment (TA only): **Marks 100+100=200**		
Aim: **To understand the practical planning aspects of a region (district/ mega/ metro region)**			

Contents		Hrs.
Module1 A: Unit - 1	**Concepts and Hierarchy** Spatial data infrastructure: Concepts, Contents, Nature and SDI hierarchy; global, national, regional and local SDI initiatives, building a SDI and using it in planning and decision making process; open geospatial consortium- ISO standards (TC2_1), data streaming and mining in spatial data infrastructure	
Unit - 2	**From Global to Local SDI applications** National SDI initiative; NRDMS; multi-level spatial data infrastructure, NSDI, assimilation and dissemination and data warehouse, state SDI, NCT Delhi SDI, Karnataka and Kerala Portals, case studies from various levels, Karnataka's land management program, Bhoomi, geo portal assisting local to state level planning process, Gujarat's tax program etc., application to coastal area planning	
Unit - 3	**SDI applications in planning and decision support** SDI- location based technology development, interoperability arrangement for geospatial data and ontology mapping, application in population datasets, natural resource repository, integrated water resource management, mKrishi- application in agriculture and rural development, geospatial application in transport, disaster management and conservation, spatio-temporal data modeling and analylis, 3D mapping of land and its use in city and regional planning, geo visualization of landscapes, rural and urban	
Unit - 4	**Technology in SDI and decision support system** Real time technologies and their application; landslide monitoring in Himalayan region, web based spatio-temporal prediction of landslides, decentralization planning in Uttarakhand-web based model, satellite based and other real time technologies and their use in identifying physical transformation, its application in urban and rural areas, slum formation, illegal colonies, flash flood warning system in river and coastal belt etc.	
Unit - 5	**District Planning/ Regional Planning** The students will be given a live case study to understand the complexity of planning of a region, inter-sector, scalar interface, integration etc. The focus will be to understand the scale of the problem and how to tackle them. It is expected that the approach will be mostly in terms of governance, which the students have acquired through theory subjects in the previous semesters. It is also expected that the students will present the final output to stakeholders to get their viewpoint.	
Module1 B:	In this stage the student shall complete all relevant literature reading to select a topic for thesis in consultation with the supervisor. The student shall complete	

	works related to the selection, justification of topic and area of research and societal and professional relevance. The student requires giving interim juries and also supporting the supervisor in research works. All relevant study and work relating to literature study, site justification, case studies and site visits should be complete. It is also mandatory for each student to publish a research paper in an approve ISSN numbered journal and or International Conference in India or abroad which should have published the entire paper in proceedings. Note: Module 1A and 1B shall be held parallel and the marking weightage shall be 50%. Separate Viva Voice shall be taken for each student.

1	Visit to

Name of the Course: **Masters in Urban & Regional Planning (MURP): Third Semester**		
Name of the Subject: **PROFESSIONAL TRAINING**		
Subject Code: **MURP308**	Semester: **Third**	
Duration: **4 weeks**	Maximum Marks: **0**	Credits: **0**
Teaching Scheme	**Examination Scheme**	
Tutorial : **N.A.**	External Assessment (viva only): **Satisfactory/ Unsatisfactory**	
Practical : **N.A.**	Internal Assessment (TA only): **Not Applicable (certification from concerned organization)**	
Aim: **To expose the students to the profession of planning and foster links with industry**		

Contents		Hrs
Unit – 1	**Concepts and Hierarchy** The student is expected to work in any project related to urban planning or any specialization such as infrastructure planning, environmental planning, transportation planning, housing etc. Individual contribution of the student in the project handled, in any of the stages of work undertaken (data analyses, project formulation, policy framing etc.) is expected Each student shall undergo professional training for a minimum 4 weeks in an establishment approved by the coordinator. Each student is required to submit a performance report from the place of training and a detailed report of the works undertaken by him/her. The content of the report should contain a brief introduction of the organization, list of work undertaken, description of individual projects worked upon, role of the student supported by verification by the organization. **Note-** The student is required to undertake summer training after 2 semesters of course study, in any government, private or research organization undertaking regional and urban planning works. The practical training shall be for a minimum period of 4 weeks. The practical training will commence during the summer break between second and third semester. However, if due to certain unavoidable issues, any student is unable to take the training after the 2nd semester, he/she shall take the training after the completion of the 4th Semester. If the student as per the clause mentioned above is unable to take the training after the completion of the 2nd Semester, his/her 3rd semester results shall reflect carryover. Once the student has completed the training after the 4th Semester all his/her results shall be declared. The results shall reflect if the student has completed training successfully and satisfactorily or not. In the Marksheet it will be mentioned: “Training Completed, Satisfactory Performance”.	

4th SEMESTER		
Name of the Course: **Masters in Urban & Regional Planning (MURP): Fourth Semester**		
Name of the Subject: **PLANNING TECHNIQUES- QUANTITATIVE ANALYSIS (ELECTIVE-III)**		
Subject Code: **MURP401-A**	Semester: **Fourth**	
Duration: **16 weeks (48 Hours)**	Maximum Marks: **100**	Credits: **3**
Teaching Scheme	**Examination Scheme**	
Lecture : **2 hrs. /week**	External Assessment: **Marks 50**	
Tutorial : **1 hr. /week**	Internal Assessment: **Marks 50**	
Aim: **To introduce techniques used for planning at various stages from preliminary to advanced**		

Contents		Hrs.
Unit – 1	**Survey techniques and Mapping** Data base for physical surveys including land use, building use, etc. and socio-economic surveys; survey techniques, land use classification or coding and expected outputs; techniques of preparing base maps including understanding the concept of scales, components and detailing for various levels of plans like regional plan, city plan, zoning plan and local area plan	
Unit – 2	**Analytical Methods** Classification of regions, delineation techniques of various types of regions, analysis of structure of nodes, hierarchy, nesting and rank size; scalogram, sociogram etc.,; planning balance sheet; threshold analysis; input output analysis, SWOT analysis	
Unit – 3	**Demographic Methods** Methods of population forecasts and projections; Lorenz curve, Ginni ratio, Theil's index, rations: urban-rural, urban concentration, metropolitan concentration; location dimensions of population groups- social area and strategic choice approach- inner connected decision area analysis	
Unit – 4	**Planning Standards** Spatial standards, performance standards and benchmarks and variable standards; UDPFI guidelines, zoning regulations and development control rules and regulations

Duration: **16 weeks (48 Hours)**	Maximum Marks: **100**	Credits: **3**	
Teaching Scheme	**Examination Scheme**		
Lecture : **2 hrs. /week**	External Assessment: **Marks 50**		
Tutorial : **1 hr. /week**	Internal Assessment: **Marks 50**		
Aim: **To provide an in-depth study of the various approaches for policy formulation, implementation and evaluation**			
Contents			Hrs.
Unit - 1	**State as a manager of resources and politics of provision** Political culture of Indian State, State and local political economy, emergence of state in the federal set up; politics of the state and bureaucracy, politics and emergence of civil society; regeneration and redevelopment politics; property rights, norms and standards, government market and market by government; regulatory state, reforming state, rent seeking state and their special implications; land use politics, politics of provision of housing in urban and rural areas, infrastructure; decision making, decision-taking process; financing and pricing, case studies from India and abroad on planning and political decisions in their impact on rural and urban development; examples from South Korea; conversion of rural land to urban land, FSI changes and resultant changes in land use and form: China, USA and other countries		
Unit - 2	**Nature and making of public policy** Nature of public problems, planning as a public issue- policy analysis and process; six steps in policy analysis: how are policies made, who influences the policy agenda and what issues affect policy's 'success' and 'failure'? What can we learn from how different countries approach similar policy problems? Theoretical frameworks, the role of institutions in the policy process and the motivation of policy actors; classical rational problem solving model; limitations in public sector and the private sector; establishing analysis		
Unit - 3	**Public Policy Analysis and strategic policy planning** Overview of policy process models; policy initiations; multi-stream approaches, policy implementation analysis, life-course approach to policy analysis, case studies in policy planning analysis, policy integration, possible areas of integration in planning; differences between strategic planning management in public and private sectors, mission statements and goal setting techniques, strategic decisions and evaluation, strategic leadership, coordination and networks, crisis management, transformational strategic management		
Unit - 4	**Public Policy Management and delivery** How are new information and communication technologies shaping public service delivery? E-governance, e-panchayats, e-markets etc.; transparency, accountability, accessibility, participatory mechanisms; trends and pressures that effect public service organizations, market based arrangements, multi-service provider arrangements in public sector setting, benchmarks in policy management, land, environment, health, water and other policies- integration and disintegration of policies- frequency and commitments to change; global commitments; MDG, environment etc. and its commitments at the national, state and local level, land policy; interest groups, acts/ agents and policy making process

Tutorial : **hrs. / week**	External Assessment (viva only): **Marks 450**	
Practical : **hrs. / week**	Internal Assessment (TA only): **Marks 450**	

Aim: **To develop independent critical thinking and design research abilities and apply the knowledge gained, skilled developed and professionalism inculcated over the last three semesters in an exercise of own interest and significant complexity**

Contents		Hrs.
Unit - 1	**Thesis** Students are expected to write a thesis on the topic selected by them with the constant guidance from faculty members; students are expected to obtained the skills in understanding the various aspects of regional planning and apply them in their thesis work. Quality work in the thesis is expected, leading to get the results published in one international conference/ Journal of international repute. **Composition Of Jury Panel For Internal Evaluation Of Thesis At Every Stage** - There shall be one or more jury panels. Each panel shall consist of the following - Senior faculty member, an architect/planner, (Professor/Asso. Professor) of the Department of the parent institution / university. Junior faculty member, an architect/planner, (Asst. Professor) of the Department of the parent institution / university. Thesis Guide(s). There shall be FOUR juries/presentations for each student in order to assess. **Composition Of Jury Panel For Final (External) Evaluation / Examination Of Thesis.** - There shall be one or more jury panels. Each panel shall consist of the following - An Architect/Planner Director / Principal / Head of the Department / Professor of the parent institution / university. An Architect/Planner Director / Principal / Head of the Department / Professor of other than the parent institution / university. An eminent architect/planner from the profession with at least 15 years of field experience. Thesis Guide(s) as member, but not part of evaluation. Further the Thesis Coordinator (s) will act as facilitator.
